

Now . . . let your eyes
do the measuring!

OPTICAL TAPEMEASURE

NOW MEASURE DISTANCE WITHOUT MOVING AN INCH . . .

Do it right from where you're standing . . . without help from another person . . . without climbing or awkward maneuvering . . . without worrying about ladders, obstacles, building materials, mud or snow . . . and without ribbons, tapes, chalk, strings or cords. If you can see the target, you can measure it! With the new Optical Tapemeasure your eyes do the work.

There's never before been an instrument like this—anywhere! The Optical Tapemeasure gives you precision measurements of any distance from 6 to 100 feet—in seconds. Measures height, too. You simply sight the object—fencepost, roof peak, electrical outlet, room corner—through the viewfinder. You'll see two images of it. Turn the focusing dial until both images "merge" into one. Then glance at the tape indicator to read the distance in feet and/or inches. That's all there is to it. It's fast . . . dependable . . . accurate (99.2% accurate at 25 feet, 97.8% at 100 feet). Ideal for contractors . . . painting, roofing, siding and wiring estimators . . . surveyors, road builders, real estate agents, home construction firms, architects, insurance firms, accident investigators . . . and a great gift for home

handymen, gardeners, etc. Pocket-size, the Optical Tapemeasure is 5½" x 3¼" x 1" and weighs just 8 ounces. Carry it anywhere. Rugged, light green Cyclocac® body with welded steel inner construction, shock absorbing optical mounts, dust-proof interior. Warranted for 5 years against defective parts and workmanship by the famous American optics manufacturer. Also includes deluxe zippered carry case in handsome brown doekin vinyl. Gift-boxed, of course.

THE ENDLESS OCTAVE

An Auditory Illusion Record

A musical scale is repeated over and over. EACH and EVERY note sounds higher than the preceding one, yet after ANY number of notes have been played the scale is still in the middle of the audible range. (On Side 2 the scale descends). A DEMONSTRATION of PERCEPTUAL LIMITATIONS in human hearing. A puzzling MIND-TWISTER. Explanation incl. ORDER NOW! Send \$3.48 to:

FOR GREATER RELAXATION, CONCENTRATION,
... listen to your
Alpha and Theta brainwaves!

Do it with an amazing biofeedback monitor. This ultra-sensitive sensor detects brain signals, lets you monitor (hear and see!) your Alpha and Theta brainwaves. Great aid to relaxation, concentration. This portable (8 x 3 x 4") lightweight (24 oz.) metal unit has a unique electrode headband to slip on or off in seconds without messy creams or solutions. Hooked to amplifier, it filters brainwaves, and signals an audible beep for each Alpha or Theta wave passed. You get both audio and visual (L.E.D.) feedback with this reliable, completely safe unit. It operates on two 9v transistor batteries, offers features comparable to many costlier models. A comprehensive instruction booklet is included.
