The Anatomy of Censorship

by *Jay E. Daily*. What is censorship and who are the censors? What is obscenity? These questions and their ramifications are being hotly contested throughout the world. And this book, packed with facts and concrete examples, will help you to take a stand in this inescapable controversy. 424 pages, \$13.75

To order, circle F on the coupon attached below.

Statistics and Society Data Collection and Interpretation

by *Walter T. Federer*. The first textbook to introduce statistical concepts without concentrating on numerical and mathematical computations. Based on the notion that statistical analysis is only as accurate as its initial data, this book emphasizes data collection and evaluation. 416 pages, \$9.75
