

THE SHAVER THAT WENT TO THE MOON!

Just wind it and enjoy an out-of-this world shave!

TRY IT FOR 90 DAYS
YOU MUST BE DELIGHTED
OR YOUR MONEY BACK!

**NO WIRES! • NO ELECTRICITY!
NO BATTERIES! • NO LATHER!
NO BOTHER! • NO WAITING!**

Now you can enjoy the same rugged, dependable shaver our astronauts used on moon mission flights. The shaver that doesn't require electric power, water or weight-and-space-wasting accessories! Just check off our checklist below, and you'll quickly discover why no other electric shaver or blade razor can match the Monaco space age shaver for performance, convenience, reliability, value!

Unique Wind-Up Spring. Monaco is the only shaver that doesn't depend on an outside energy source. It's powered by a rugged, dependable wind-up spring. Which makes it—and you—very independent. Just give the winding key six or seven turns and you have enough power for a perfect shave.

Use It Anywhere. You can use Monaco wherever you are—even if that's deep in the woods on a hunting trip. And every day at home and work, in the office, in the car! Or when you're flying or riding to an important meeting and want to get rid of that "5 o'clock shadow."

Clean, Comfortable Shave. You never have to worry about nicks and scratches with *this* shaver. The super-thin shaving head floats gently over your face, guiding whiskers into thousands of tiny perforations. Surgical steel blades revolve an amazing 72,000 times per minute, slicing your whiskers off smoothly at the skin line. Without the hacking and chopping of ordinary slower-acting shavers.

Reliability. Monaco is made to run like clockwork — year after year! The reason? It's carefully crafted by skilled Swiss watchmakers!

Convenience. Now you can forget about messy lathers, looking for electric outlets, replacing or recharging batteries. Everything you need for a close, comfortable shave is right in the palm of your hand!

Maintenance-Free Operation. All parts of this fantastic shaver are made of the very finest materials. The surgical steel blades are self sharpening, so the longer you use them, the better they get. The mainspring is made from the same Swedish Super-Steel used in the finest watches. And to ensure years of trouble-free performance, it's sealed and permanently lubricated.

Compactness. The Monaco is specially contoured to fit snugly in the palm of your hand—giving you complete control at all times.

Money-Saving Advantages. Just imagine how much money you'll save on shaving cream and blades. And if you use a shaver, you'll never have to buy batteries again, or pay for electricity. You just can't beat Monaco, the space age shaver.

Now that you know why Monaco is the choice of America's astronauts, isn't it time you bought this "heavenly" shaver for yourself? Only \$19.99! Try it 90 days. If you don't agree it's the greatest shaver you ever used, just return it for refund. No questions asked.

Monaco Wind-Up Shaver Only \$19.99

ANOMALIES

Anomalies are things that don't fit --- like the "m" above. The Sourcebook Project sifts 200 years of literature and retrieves records of strange events and curious discoveries, our heritage of scientific anomalies and the clues to tomorrow's science.

EXAMPLES OF SCIENTIFIC ANOMALIES

Scientific journals are full of anomalies: ball lightning, mountain-top glows, the Yellowstone Lake whispers, earthquake lights, the Carolina Bays, musical sands, precolumbian contacts, intramercurial planets, and thousands more.

Scientific anomalies beg for explanations. They are so common that they suggest that science is far from complete, that exciting frontiers remain. These data must be amassed and evaluated.

Peculiar fingers of light seen during lunar eclipse

A RESPONSIBLE APPROACH

The objective of the Sourcebook Project is to collect, organize, and reprint anomalous data extracted primarily from the scientific literature. *Nature*, *Science*, *Scientific American*, *Meteorological Magazine*, and the *American Antiquarian* are typical contributors to the sourcebooks. The older literature is a special target because few have access to it. The sourcebooks beat no drums and promote no wild hypotheses. However, they are strongly biased toward the strange and unusual aspects of the universe because there lie the frontiers.

A LIBRARY OF FUTURE SCIENCE?

The sciences of tomorrow, whatever they may be, are not in our current textbooks anymore than quasars, mascons, charmed quarks, Stonehenge astronomy, or tectonic plates were in the schoolbooks 20 years ago. The sourcebooks are no final answer, of course; they provide only starting points. They are intriguing, mind-expanding, and sometimes infuriating because no dogma, scientific or pseudoscientific, is sacred.

The sourcebooks appear in several series; one series for each major branch of science; Within each series, entries are separated into such categories as ball lightning, megalithic circles, boulder trains, and whatever logic demands. A ringbinder format permits like categories to be interfiled as new material is published. Each volume is indexed. The colorful hard-cover binders are specially printed and make handsome additions to any library.

SOME COMMENTS FROM REVIEWS

"Every library should have a copy; it stirs thinking and inquiry." *Choice*

"At the price it is excellent value for entertainment alone; there is also the added bonus that such a collection must include something which will become 'reputable' in the near future." *Nature*

"Within the scientific community there are bitterly antagonistic views about the value of data, such as these, that cannot be understood using known scientific hypotheses." *Choice*

"These are the only two books I've had to keep in my drawer. If I leave them on top of my desk, nobody can pass by without picking one up." *Village Voice*

"It's the kind of book you don't dare pick up if you have to be somewhere soon." *Galaxy*

"Recommended for high school and college libraries and curious readers in general who enjoy speculations." *Science Books*

SOME SOURCEBOOK USES

Scientists - Who desire authoritative, elusive accounts of rare and curious natural phenomena for study and analysis, as well as leads to new areas of research

Librarians - Who need selections of key articles (with indexes) to answer questions and aid research on the frontiers of science

Teachers - Who want fresh and challenging course material

Students - Who look for ideas and substance for unique papers and research projects

Anyone - Who is curious about the natural world and man's relation to it

FIVE SOURCEBOOKS NOW AVAILABLE

STRANGE UNIVERSE,
Vol. A1, 1975, 279 pp., \$7.95.

Sampler of Article Titles: SWIFT'S FORECAST OF MARS' SATELLITES***VULCAN AND BODE'S LAW *** HUTH'S "MOVING STAR" OF 1801-2***THE SUPPOSED PLANET VULCAN***AN UNEXPLAINED OBSERVATION***BRILLIANT OBJECT SEEN NEAR THE SUN*** LIGHTNING-LIKE PHENOMENA ON THE MOON***SIGNALS FROM MARS***SUNSPOTS AND THE PLANETS***BRIGHT OBJECTS PASSING THE SUN***THE SATELLITE OF VENUS

The standing stones of Callanish

STRANGE PLANET,
Vol. E1, 1975, 283 pp., \$7.95.

Sampler of Article Titles: THE GREAT DINOSAUR DISASTER *** THE MAMMOTH AND THE FLOOD *** A TOAD IN THE SOLID ROCK *** LEGENDARY ISLANDS OF THE NORTH ATLANTIC *** A DRY QUICKSAND *** MYSTERY IMPRINTS STUMP GEOLOGISTS *** WHY THE ROCKS RING *** THE SINGING BEACH OF MANCHESTER, MASS. *** CAROLINA BAYS AND THEIR ORIGIN *** DID A COMET COLLIDE WITH THE EARTH IN 1908? *** THE MYSTERY OF THE MIMA MOUNDS

STRANGE PHENOMENA,
Vol. G1, 1974, 277 pp., \$7.95.
