

# HOW CURRENT IS YOUR ASTRONOMY LIBRARY?

Bring it up to date with these exciting books, and enjoy these special savings to readers of *Science News*.

## The Solar System

A *Scientific American* Book

It has been less than twenty years since the first space vehicle—a tiny satellite—ventured off our planet. Yet in those years we have learned more about the sun, the planets, and interplanetary space than in all the preceding centuries of earthbound observation. *The Solar System* is an exciting compendium of our new knowledge, written by some of the leading astronomers of our day and beautifully illustrated in the *Scientific American* tradition.

1976, 145 pp., 96 illus. (44 with color), \$8.50 **Special Price \$7.23** (Softcover \$4.50)

## Highlights in Astronomy

Fred Hoyle

This short, nonmathematical introduction to astronomy presents the full scope of the science: from the structure of the Earth to the latest cosmological speculations, and from the phases of the moon to such phenomena as pulsars, quasars, and black holes. The 149 illustrations include nearly 100 photographs, many in full color.

"He has hit the celestial nail fair and square on the head. . . . Superb communication, laced with wit and clever ideas. . . . Would that there were more science writing of this quality around."

—*New Scientist*, November 6, 1975

1975, 179 pp., 149 illus. (136 with color), 3 tables, \$12.00 **Special Price \$10.21** (Softcover \$5.95)

## The Universe Unfolding

Ivan B. King, University of California, Berkeley

Understanding is the central theme of this new book; *The Universe Unfolding* surveys our current knowledge of the physical universe, tells *how* astronomers have acquired this knowledge, and shows how astronomical questions are related to scientific thought in general. The book concentrates on fundamental questions and avoids both encyclopedic detail and mathematical arguments. It is profusely illustrated with more than 340 photographs and drawings, including a special section in full color.

1976, 504 pp., 345 illus. (12 in full color), \$14.95 **Special Price \$12.71**

## New Frontiers in Astronomy

Readings from *Scientific American*

Selected and Introduced by Owen Gingerich, Harvard University and Smithsonian Astrophysical Observatory

*New Frontiers in Astronomy* is an up-to-date collection of thirty-one of the best astronomy articles from *Scientific American*. More than half of the articles have appeared since 1970, and each is reproduced with its full text and illustrations.

"The selection of these articles . . . must have been a difficult task, but the editor accomplished it magnificently. Think of a topic in astronomy and it will probably be included."

—*Astronomy*, January 1976

1975, 369 pp., 329 illus. (151 with color), \$13.00 **Special Price \$11.06** (Softcover \$7.50)

## The Galactic Club

Intelligent Life in Outer Space

Ronald N. Bracewell, Stanford University

An eminent radio astronomer shares the serious plans now being made for extraterrestrial communication, space travel, and the colonization of space. Are there other intelligent beings in the universe? How close to reality are the theories of Velikovsky and von Daniken? What do you say to a nonhuman? These are some of the questions answered in this thoroughly absorbing book.

"Entertaining and thought-provoking. . . . The far-out ideas are fittingly matched with a selection of bizarre and exotic illustrations. . . . An excellent book on a fascinating topic."

—*Astronomy*, August 1975

1975, 141 pp., 59 illus., 2 tables, \$6.95 **Special Price \$5.91** (Softcover \$3.95)

## BUILDING CONSTRUCTION ILLUSTRATED

By Francis D. K. Ching

320 pp.,  
over 1,000 illus.,  
11 x 14, \$9.95 paper

Over 1,000 drawings bring you step-by-step techniques in residential and light construction

For graphic, easy-to-use guidance in residential and light construction, consult **Building Construction Illustrated**. All aspects of planning and site work are covered in this huge volume. Virtually every one of its pages is a self-contained building plan in both U.S. and metric standards. It includes cost estimating—construction sequencing—footing and foundation systems—floor, wall and roof systems—doors and windows—moisture and thermal protection—special construction—finish work—mechanical, electrical and plumbing systems—building materials—and more.

## GEMSTONES FOR EVERYMAN

By B. W. Anderson

384 pp., illus.,  
\$25.00

Precise, up-to-date information on all essential aspects of precious stones

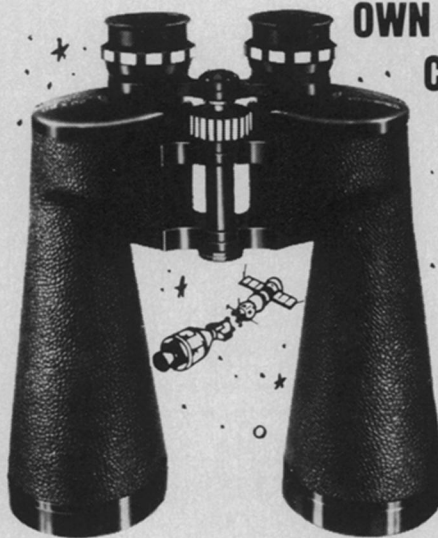

With this book you'll have easy access to a vast store of information on gemstones. Examined are topics such as occurrence and recovery; cutting and polishing; crystals and cubes; how light behaves in gemstones; hardness, cleavage and density; accessories for the amateur collector; and much more. A separate section is devoted to each family of gemstones, and there is a thorough glossary and index. Published by Van Nostrand Reinhold Company.

## OWN THE BINOCULAR NASA CHOSE FOR APOLLO/SOYUZ!

For the historic U.S.-Russian space flight and link-up, this powerful 20X60 binocular was slightly modified. Own the original! It's our biggest, most powerful for distance (designed to help the Astronauts look back at earth from 157 miles out in space). Big 60 mm objective lenses. 173-ft. field of view at 1000 yards. Relative brightness, 9.0. Fully coated optics. 20X special design eye lenses. Coated BK-7 Porro prism. Extra long All-American style with fold-down rubber eyecups. Just **\$99.95** 47.5 oz. (9¼ x 8½"). Includes case and straps. No. 1556Q just **\$99.95** Ppd.

Reg. 8X30 Binocular, An Unbelievable Bargain Fully coated optics, European style body (4½ x 6¼", just 19 oz.). Field of view at 1000 yards, 392 ft. Great for hunting, races. No. 1559Q only **\$27.50** Ppd.

HELPING TO DEVELOP AMERICA'S TECHNOLOGY FOR OVER 30 YEARS.

## MATH WITHOUT TEARS

In lively non-technical language Roy Hartkopf gives you a basic understanding of many of the everyday applications of mathematics.

Emphasizing the practical aspects of math, the author avoids mathematical terms and jargon and takes the reader from simple counting to trigonometry and calculus.

MATH WITHOUT TEARS is written with a light touch and is filled with interesting anecdotes, spiced with humor.

Learn math in the comfort of your own home at minimum cost. ORDER NOW:  
\$7.95 plus 50¢ handling 10-Day Money-Back Guar.

Buchanan, N.Y. 10511

## INDUCTION HEATING

A water cooled loop consisting of one or more turns of copper tubing is energized by high frequency currents. A piece of metal or conductive material placed loosely in the coil melts almost instantly due to induced currents. Induction is widely used for production soldering and brazing, hardening, etc. It has countless uses; enough industrial applications to fill a book.

### MACROWAVES™

work like microwaves on the principle of vibrating molecules in non-conductors, i.e. food, wood, adhesives, coatings, paper, cloth, etc. It has endless uses in "instantaneous" drying, defrosting, cooking, heating, etc., etc. Macrowaves™ pass through solid objects immediately regardless of thickness.

If you have a product you want to heat or dry call us.

Radio Frequency Co., Inc.  
50 Park St., Medfield, Mass. 02052  
Boston phone: 617-762-4900

### P.S.

We are looking for people to service, install, run samples, etc. Chief requirement is innovative capability, and a genuine interest in this exciting field.

## How to Argue and Win!

Here is a clear simply written basic guide to logical thinking, showing how to spot the fallacies, the prejudices and emotionalism, the inappropriate analogies, etc., in the other fellow's argument and how to watch for and avoid the irrational in your own judgments. The author makes plain not only how but also why people resist facing the truth.

A tool for clear thinking as well as convincing others. ORDER NOW:  
**THE ART OF ARGUMENT, By Giles St. Aubyn**  
\$5.95 plus 50¢ handling 10-Day Money-Back Guar.

# WADE NO MORE.

You'd have to wade through this much material to get the information in one issue of **Science News**.

Proof? Right here in every issue of our unique magazine, a weekly employing some of the finest science reporters and writers in the business. Journals are highly specialized and, by their very nature, six to twelve months behind the times. Newspapers too often wait for the Spectacular and Stupendous, then give it three paragraphs. Digests leave you still hungry. But **Science News** reports on the latest developments in all science fields, every week. And not just what's appeared in journals. We cover scores of scientific meetings, visit laboratories, interview researchers. And then put it all together for you. Concise. Thorough. Authoritative. Up-to-the-minute. And a joy to read. All for only \$10 a year.
