INTERDISCIPLINARY SCIENCE REVIEWS

EXECUTIVE EDITOR
Dr Anthony R. Michaelis
Consultant Editor
Dr Peter J. Fargo

FIRST IN THE WORLD

This is the first journal entirely devoted to critical interdisciplinary reviews of the pure and applied, the social and economic sciences. Over 60 of the world's most eminent scientists, including 9 Nobel Laureates, form the Editorial Board and are actively involved in the journal's policy and publication.

A NEW DISCIPLINE

ISR reports on successful interdisciplinary concepts, approaches and techniques. It constitutes the basis for a new systematic analysis of interdisciplinary investigations.

WIDE – RANGING CONTRIBUTIONS FROM THE NATURAL, ENGINEERING AND SOCIAL SCIENCES

ISR will only publish interdisciplinary papers contributing from at least two fields of human endeavour. These will be:

- * Reviews of the border areas between two or more natural sciences.
- * Articles on the effects of science and technology on society.
- * Contributions which further the cultural and intellectual links scientists are forging with the arts and humanities.

HIGHEST ACADEMIC STANDARDS

The reviews published in ISR are of the highest authoritative level by internationally recognized authors. Each article is suitably refereed and contains an appropriate bibliography. The language of the journal is English, and authors' individuality of style will be preserved.

TOP-LEVEL READERSHIP

Those who plan, direct, finance and execute science and its policy will want to place a subscription order and have the opportunity to read ISR regularly. Interdisciplinary Science Reviews will be of special value to decision-makers at universities, in industry and commerce, government agencies, and all who follow scientific progress critically on a higher intellectual plane. A heavy demand is anticipated in all libraries with a scientific interest. ISR has a concise and critical approach, and brings a new dimension to science communication. It aids understanding, helps information transfer, saves literature searching, and stimulates new thinking.

ISR is a New Quarterly Journal. Annual Subscription \$44.00

ISSUE1 – MARCH 1976

Dr H. Guyford Stever	Promises and Problems of Science: Some Economic and Ethical Aspects
Sir Alan Cottrell, F.R.S.	The Contribution of Science to the Economy: A United Kingdom Point of View
Prof. Dr Manfred Eigen and Dr Ruthild Winkler	The Game of Evolution
Sir Misha Black, OBE	The Aesthetics of Engineering
Roger Naude	The OKLO Nuclear Reactors – 1800 Million Years Ago
Prof. S. Anthony Barnett and Dr P.E. Cowan	Activity, Exploration, Curiosity and Fear: An Ethological Study
Dr Leslie Fowden, F.R.S.	Phytochemistry: The World of a Chemist among Plants
Dr Paul Prave, Dr D. A. Sutkatch and Dr U. Faust	Bio-Technology: The Industrial Production of Natural Substances

ISSUE2 – JUNE 1976

Dr Anthony R. Michaelis	Editorial – The American Bicentennial - In Default
Michael Michaelis	Comment - How to Get from Here to There
Prof. Sir Alan Hodgkin, O.M., F.R.S.	The Early Years of Anglo-American Co-operation in Science
Prof. Sir George Porter, F.R.S., and Dr M.D. Archer	In Vitro Photosynthesis
Paul Streeten	The Meaning and Purpose of Interdisciplinary Studies As Applied to Development Economics
Colin A. Ronan	Astronomy and Music: Music of the Spheres
Jack M. Nilles	Interdisciplinary Research and the American University
Prof. Leslie Fox	Numerical Analysis, Computers and Problem-solving
Matthew Huxley	Criteria for a Socially Sanctionable Drug

SCHEDULED REVIEWS

Dr M.R. Bloch	The Role of Salt in Human History
Dr Philip Handler	On the State of Man
Dr Peter E. Glaser	The Solar Climate Control Project
Prof. J. Meadows	Diffusion of Information across the Sciences
Dr Joseph Needham, F.R.S.	The Oecumenogenesis of Science
Prof. Arthur J. Birch, F.R.S.	Biosynthesis
Arnold A. Bondi	Why Economists Should Know Chemistry
Prof. R.D. Brown	Galactochemistry
Sir George Deacon, F.R.S.	The Antarctic Ocean
H.A. Ferguson	The Delta Project – An Interdisciplinary Challenge
Prof. John J. Hopfield	Biological Molecules from a Physics Viewpoint – New Principles from Old
Prof. D.J. Bradley, F.R.S.	High Power Lasers and their Applications
Sir James Lighthill, F.R.S.	Mathematics and Society
Prof. Tobias Owen	Exploration of the Solar System: A Review of Recent Results
Dr Peter Witt	Spider Web Design and Engineering
