3600 Million Years

OLD

THE ULTIMATE RELIC, A PIECE OF
THE PRIMORDIAL EARTH

Put your mundane concerns in a cosmic perspective with a piece of granite from a deposit of the oldest material known in the world. This ancient granite gneiss is older than half the age of our planet—nearly a quarter of the age of the universe. Scratch it and you can expose to sunlight surfaces that have lain in darkness since before life began on earth.

Each fist-sized specimen comes with a steel stand and description of where the rock came from, how it formed, and how its age was determined. Cost is \$6 per specimen—plus \$1.50 for postage and handling.
