How the Club Operates • The Book Club News, describing the coming Main Selection and Alternate Selections, will be sent to you 15 times a year at 3-4 week intervals. • If you wish to purchase the Main Selection, do nothing and it will be shipped to you automatically. • If you prefer one of the Alternates, or no book at all, simply indicate your decision on the reply form always enclosed with the News and mail it so that we receive it by the date specified. • The News is mailed in time to allow you at least 10 days to decide if you want the coming Main Selection. If, because of late mail delivery of the News, you should ever receive a Main Selection without having had the 10 day consideration period, that Selection may be returned at Club expense. • Continued membership past the trial period brings you the added benefits of our Bonus Book Plan—an important way to save more, at least 70% off publishers' prices.

86300. THE WAY THE EARTH WORKS. Peter J. Wyllie. Introduction to the new global geology and its revolutionary development. **\$12.95**

53583. THE HOT-BLOODED DINOSAURS. Adrian J. Desmond. A radically different picture of the dinosaurs, vastly more sophisticated and efficient than paleontologists have heretofore believed, with carefully-reasoned scientific evidence to back it up. A fascinating book. **\$12.95**

34210. THE ARCHAEOLOGY OF NORTH AMERICA. Dean Snow. Photographs by Werner Forman. With nearly 200 photographs, maps and charts, resurrects the world of the North American Indian, from the first crossings onto this continent 30,000 years ago to the discovery of the last stone-age man who died in the 20th century. **\$18.95**

48390. FATU-HIVA. Thor Heyderdahl. The author and his bride's youthful adventures in the South Pacific's Marquesas—an adventurous and beautiful idyll—dangerous and liberating. **\$10.00**

67661. THE PENGUIN DICTIONARY OF SCIENCE. E. B. Uvarov and D. R. Chapman. Revised and Edited by Alan Isaacs. Many illustrations. **\$11.95**

Show and tell ...professionally

High schoolers whose science fair exhibits won their way to the International Science and Engineering Fair at Denver this spring may already have learned some lessons about communicating science that many a professional has yet to learn. They have succeeded in a format that is catching on fast.

There is nothing sacred about standing up in front of a seated audience and delivering a lecture. Major professional gatherings now permit an alternative—poster sessions. Here the audience strolls by, sampling visually. When one sees something interesting, one stops. Conversation ensues at whatever level of depth the parties can handle. Information is traded. Boredom is minimized.

How to make your story stand up and attract interest can be learned young. *Good photography is a great help.* A big print can snap the passerby to attention and convey the heart of the matter. Good science that goes unnoticed might as well be bad science. That's reason enough for a career scientist to get into photography while still in high school.

Our package of photographic hints for science fair contestants is free for the asking from Kodak, Department 841, Rochester, N.Y. 14650.

How to Argue and Win!

Here is a clear simply written basic guide to logical thinking, showing how to spot the fallacies, the prejudices and emotionalism, the inappropriate analogies, etc., in the other fellow's argument and how to watch for and avoid the irrational in your own judgments. The author makes plain not only *how* but also *why* people resist facing the truth.

A tool for clear thinking as well as convincing others. **ORDER NOW!**
