3600 Million Years

OLD

THE ULTIMATE RELIC, A PIECE OF THE PRIMORDIAL EARTH

Put your mundane concerns in a cosmic perspective with a piece of granite from a deposit of the oldest material known in the world. This ancient granite gneiss is older than half the age of our planet—nearly a quarter of the age of the universe. Scratch it and you can expose to sunlight surfaces that have lain in darkness since before life began on earth.

Each fist-sized specimen comes with a steel stand and description of where the rock came from, how it formed, and how its age was determined. Cost is \$6 per specimen—plus \$1.50 for postage and handling.

can be very
hard . . .

. . . Or
very easy.

It's really up to you. If you have plenty of time, shelf space, and money you may not need **SCIENCE BOOKS & FILMS**. But if you're looking for a quick, *reliable* way to find good science information sources, let **SB&F** be your guide. Each issue reviews hundreds of the latest trade books, textbooks, reference works, and 16mm films in the pure and applied sciences. Using this single selection tool, you can find good science materials for readers and viewers at all levels—from kindergarten through college. And you can have confidence in the reliability of the reviews and the rating system. Our reviewers are specialists with scientific expertise as well as practical teaching experience. Their signed reviews are authoritative, informative, and interesting. A simple coding system shows at a glance how the reviewer rates each book or film and for what level it is suitable. So the next time you're looking for science materials—on euthanasia . . . or land use and misuse . . . or manned spacecraft . . . or atomic physics . . . or hang gliding . . . or endangered wildlife . . . or ants . . . or whatever—remember **SB&F**. We take the trouble to save you time and money.
