BOOKS is an editorial service for readers' information. To order any book listed or any U.S. book in print please remit retail price, plus 25c handling charge for each book to **BOOK ORDER SERVICE**, Science News, 1719 N. Street, N.W., Washington, D.C. 20036. All books sent postpaid.

**THE EXISTENTIAL PLEASURES OF ENGINEERING**—Samuel C. Florman—St. Martin, 1976, 160 p., \$7.95. Erudite essay on the emotional fulfillment the engineer derives from applying analysis, rationality, practical ingenuity and responsible imagination to the problems of engineering, trying to find the best solutions contemporary know-how permits.

## Math "Bug" You?

**LEARN MATH AND ENJOY IT!** Impossible? Not with **MATHEMATICS FOR EVERYMAN** by Egmont Colerus, a self-teaching manual guaranteed to increase your math know-how. From Simple Numbers to the Calculus.

The author assumes no previous acquaintance with mathematics, and advances the reader . . . by patient, carefully-phrased exposition and by building the discussion step-by-step. —New Technical Books (of the New York Public Library).

Learn math at home comfortably and at minimum cost. 10 day Money-Back Guarantee. ORDER NOW! \$6.95 plus 60c handling

EMERSON BOOKS, Inc., Dept. 528C  
Buchanan, N.Y. 10511

**HANDBOOK OF MEDICAL ACUPUNCTURE**—Frank Z. Warren, M.D.—Van Nos Reinhold, 1976, 285 p., photographs, tables, \$15. Professional handbook explains how classical Chinese precepts of acupuncture have successfully been adapted to American clinical treatment.

**A HISTORY OF  $\pi$  (PI)**—Petr Beckmann—St Martin, 1976, 2nd ed., 203 p., illus., paper, \$4.95. Correlates the history of the erratic progress made in the mathematicians' search for the value of pi (the ratio of the circumference of a circle to its diameter) with the general intellectual climate of the times.

**LIES, DAMN LIES, AND STATISTICS:** The Manipulation of Public Opinion in America—Michael Wheeler—Liveright, 1976, 318 p., \$9.95. A study of polls and polling techniques, opinion sampling, the particular methods of Gallup, Harris, Nielsen and others, and the influence on public opinion that published, unevaluated or misinterpreted political and commercial polls can have.

**MANNED SPACECRAFT**—Kenneth Gatland—Macmillan, 1976, 2nd ed., 302 p., photographs, illus. in color by John W. Wood et al., tables, \$6.95. Compact and comprehensive history of manned spaceflight, with data from first Vostok to space shuttle preparation.

## MURPHY'S LAWS!

Incomparable "scientific" wit. Colorfully lithographed on 8" x 10" heavy Parchment for framing. A great business or personal gift! Only \$3 (4/\$10). Four Corners Press, Dept. GSS, Hanover, Mass. 02339.

**MEN WHO DARED THE SEA:** The Ocean Adventures of the Ancient Mariners—Gardner Soule—T Y Crowell, 1976, 272 p., illus., \$9.95. From the beginnings of time to A.D. 500, the book traces the history of man as ship builder and navigator.

**PLANTS AND ANIMALS OF THE PACIFIC NORTHWEST:** An Illustrated Guide to the Natural History of Western Oregon, Washington, and British Columbia—Eugene N. Kozloff—U of Wash Pr, 1976, 264 p., 321 color photographs, 125 drawings, map, \$14.95 till 12/31/76; \$17.50 thereafter. Includes 450 species of plants and animals—trees, shrubs, vines, major wildflowers, ferns, amphibians and reptiles.

**REGULATION OF HUMAN FERTILITY**—Kamran S. Moghissi, M.D. and Tommy N. Evans, M.D., Eds.—Wayne St U Pr, 1976, 318 p., illus., tables, paper, \$22. Takes stock of advances in the field of contraceptive improvement and development, including approaches and techniques under investigation that hold promise for the future.

**THIS BROKEN ARCHIPELAGO:** Cape Cod and the Islands, Amphibians and Reptiles—James D. Lazell, Jr.—Quadrangle, 1976, 272 p., photographs by Martin C. Michener, maps, \$12.50. Informal narrative provides a wealth of scientific information about localities and life histories of the region's salamanders, frogs, turtles, and snakes.

**WILD ENDEAVOUR**—Don and Bridget MacCaskill—Taplinger, 1976, 160 p., plates, \$11.95. Forrester-writer and photographer take the reader into the Scottish Highlands, tracking deer, badgers, foxes, owls and sparrowhawks to follow their progress through courtship and the raising of their young.

# Show and tell ...professionally

High schoolers whose science fair exhibits won their way to the International Science and Engineering Fair at Denver this spring may already have learned some lessons about communicating science that many a professional has yet to learn. They have succeeded in a format that is catching on fast.

There is nothing sacred about standing up in front of a seated audience and delivering a lecture. Major professional gatherings now permit an alternative—poster sessions. Here the audience strolls by, sampling visually. When one sees something interesting, one stops. Conversation ensues at whatever level of depth the parties can handle. Information is traded. Boredom is minimized.

How to make your story stand up and attract interest can be learned young. *Good photography is a great help.* A big print can snap the passerby to attention and convey the heart of the matter. Good science that goes unnoticed might as well be bad science. That's reason enough for a career scientist to get into photography while still in high school.

Our package of photographic hints for science fair contestants is free for the asking from Kodak, Department 841, Rochester, N.Y. 14650.
