PLANET TREK

COSMOS 1977

A new art reprint calendar from ASTRONOMY

Cosmos 1977 carries into its fourth year a tradition started when ASTRONOMY magazine was born — to provide you the most visually stunning view of the universe possible.

This year's calendar brings our promise to you in its ultimate form. Cosmos 1977 is a collection of 13 full color varnished reproductions of some of the best cosmic art and photographs that have appeared

in ASTRONOMY. From the surface of the red planet Mars and glowing tail of comet West, to worlds beyond at the heart of a distant star cluster, the colorful, pictorial universe is displayed in a format that "begs" that the subjects be framed.

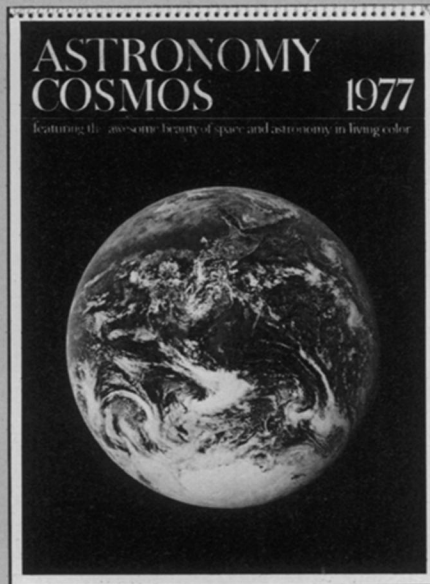

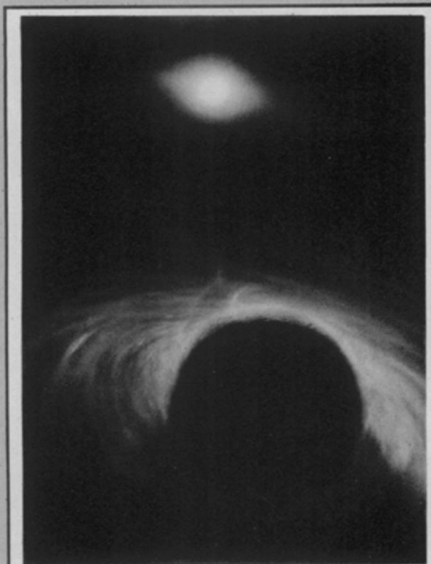

Each illustration, printed on coated 80 lb. paper, is surrounded by a 1/4" white border for greater ease in framing. As

with last year's calendar, complete framing instructions are provided. Cosmos 1977 is spiral bound and hole punched so that the calendar may be conveniently hung. (Both hole and wire spiral are within the white border away from the illustrations.)

Hallmarks of ASTRONOMY's quality and beauty epitomize this distinctive calendar whether the illustrations are framed immediately or the calendar hung and used throughout the year.

Exciting Features Include:

- Full color, varnished art & photos
- Framing instructions provided
- Punched for hanging
- Planet oppositions & special sky events noted
- Room to jot birthdays and other appointments
- 1977 Calendar

An Outstanding Christmas Gift
only \$4.50 each

(Include 75¢ per order for shipping & handling.)

We will start shipping orders for COSMOS 1977 on Monday, Nov. 15, 1976.
