

INSTANT FURNITURE

By Peter S. Stamberg
160 pp., \$12.95

Make your own low-cost, well-designed, easy-to-assemble furniture and shelving

All that's needed to produce instant furniture is wood precut in any lumber yard, glue, nails—and this remarkable book. It explains a completely new construction technique that requires no fancy tools, equipment or joinery. This method is unbelievably cheap. Everything is made of wood, in stock sizes. And it's fast. Beautiful and unusual pieces can be turned out in a few hours.

SOUND RECORDING

By John Eargle

338 pp., \$16.95

Clearly explains today's recording devices, systems and methods

Keeping involved theory and mathematics to an absolute minimum, this practical manual provides fully illustrated coverage of modern recording devices and their applications. From fundamentals of sound generation and propagation to the latest details of disc recording, it brings you information in areas such as automated mix-down systems, methods for signal processing or conditioning, and the broad range of devices used to modify basic recorded sounds.

SPRING CLEARANCE ON PROGRAMMABLES

SCIENTIST PR 4525 - The most powerful programmable in its price range!

Features:

- *Learn-mode 100-step programming capacity
- *Simplified programming: you simply engage a Learn-Switch & perform a problem in a normal manner. The 4525 records the formula, allowing you to debug programs as it's written
- *Several different programs can be contained at the same time
- *Delete feature lets you correct programs while writing them
- *Skip key permits skipping over entire programs to access additional programs. *Programs remain intact until new ones are written over/ when power is turned off. *Total freedom to select keyboard entries as variables or constants. *Automatic display signal informs you when you exceed capacity; 4-level stack; RPN logic; 8-digit plus 2-digit exponent; full-floating decimal; scientific notation: common/natural logs, trig functions; square roots; reciprocals; powers & roots; Speed: basic functions: 1.0 sec. typical, 2.25 sec. max./ .01 sec. min.

Comes complete with AC Adapter/Charger,
Ni-cd batteries, padded carrying case

\$44.88

STATISTICIAN PR 6035

***100-step programming capability like the Scientist PR with performance features expressly for statistical problems:**

Single-key sum of x , x^2 and n ; mean and standard deviation; sum of x and y values for linear correlation and regression; Linear correlation coefficient and slope of curve; y -axis intercept or any point on y -axis; Delete key for x and y values; Standard deviation of grouped data key; live % key with automatic add-on, discount or net; Square root, square and change-sign keys; Full accumulating memory with mem-plus, equals-plus, auto-repeat add & subtract, auto constant in multipl. & div; Floating entries and intermediate answers. Speed: all functns: .01 sec. min./2.0 secs. max., .75 sec. typical.

Comes complete with AC Adapter/Charger,
Ni-cd batteries and padded carrying case.

WADE NO MORE.

You'd have to wade through
this much material to get
the information in one
issue of Science News.

Proof? Right here in every issue of our unique magazine, a weekly employing some of the finest science reporters and writers in the business. Journals are highly specialized and, by their very nature, six to twelve months behind the times. Newspapers too often wait for the Spectacular and Stupendous, then give it three paragraphs. Digests leave you still hungry. But Science News reports on the latest developments in all science fields, every week. And not just what's appeared in journals. We cover scores of scientific meetings, visit laboratories, interview researchers. And then put it all together for you. Concise. Thorough. Authoritative. Up-to-the-minute. And a joy to read. All for only \$12.50 a year.
