A scanning electron micrograph (SEM) showing a complex, fibrous biological structure. The image features several thick, parallel, cylindrical fibers with a textured, striated surface. These fibers are interconnected by a network of thinner, more delicate fibers. The overall appearance is that of a highly organized, structural material, possibly a biological fiber or a synthetic polymer. The lighting creates strong highlights and shadows, emphasizing the three-dimensional nature of the structure.

Get Your SN On Time?

We still continue to get occasional complaints of erratic mail delivery of Science News. Each issue of SN is mailed on Friday, the day before the date shown on the cover. With the exception of one or two combined double-sized issues a year, which are announced in advance, we hold to this schedule invariably. We have never missed a printing/mailling deadline. This means that the problem is with the U.S. Postal Service. If there are delays in arrival of Science News, please complain to the Postmaster of your city, with a carbon copy to us.

SN1

“The best book on solar I've seen to date.”

Richard Stepler. **Popular Science**

**THE
SOLAR HOME
BOOK**

Bruce Anderson with Michael Riordan
 304 pages, \$7.50

**OVER 80,000
COPIES SOLD**

The first book to deal honestly with the drawbacks and blessings of home solar heating and cooling. Simple yet complete, with a wealth of photographs, drawings and diagrams, it's the book for homeowners, tradespeople, designers, apartment dwellers, and all interested in energy options. Allows anyone to build with the sun.

“This is among the best of the new books on solar energy as a viable alternative energy source for homeowners.” **Library Journal**

“A much needed contribution to the state of the art of solar heating and cooling a house. It is ‘must’ reading for anyone who is thinking about building a house—solar or otherwise.” **New York Times**

Please send me _____ copy(ies) of *The Solar Home Book* at \$7.50 each, plus 75¢ per book handling charge. Make check payable to:
