**Fractal recalculation**

In the article "Fractals: A World of Nonintegral Dimensions" (SN: 8/20/77, p. 122), it is stated in regard to the Koch curve: "At each stage in its construction, the length of the curve increases by four-thirds, yet the area enclosed increases by only one-third." According to my calculations, the one-third increase in area enclosed is true *only for the second stage* in the construction of the curve. For each stage thereafter, the area enclosed increases by only four-ninths of the area increase of the preceding stage. Thus, after several stages, the fractional increase in total area per stage becomes very small indeed—not one-third.

Roland Rainge  
New Salisbury, Ind.

(Reader Rainge is entirely correct. The area added in successive steps in constructing the Koch curve forms a geometric series. If the original triangle has a side length 1 (and area 3/4), then the area enclosed by the Koch curve is:

$$\left(\frac{\sqrt{3}}{4}\right) \left[1 + \frac{1}{3} + \left(\frac{4}{9}\right) \left(\frac{1}{3}\right) + \left(\frac{4}{9}\right)^2 \left(\frac{1}{3}\right) + \dots\right]$$

The sum of this geometric series is

$$\left(\frac{\sqrt{3}}{4}\right) \left[1 + \left(\frac{1}{3}\right) / \left(1 - \left(\frac{4}{9}\right)\right)\right] = \frac{2\sqrt{3}}{5}$$

This (very finite) number, approximately .693, is the area enclosed by the Koch curve.—Ed.)

**Antiviral Agents**

Although it is true that the development of antiviral agents has lagged far behind that of antibacterials, this is *not* primarily because "antibiotics attack bacteria in the bloodstream without hurting cells" (SN: 8/20/77, p. 116). Transient bacteremia (bacteria in the bloodstream) does accompany the early phase of many infections, but the blood-borne bacteria are quickly removed by phagocytes in the liver, spleen, and bone marrow. The main work of antibiotics is accomplished in the extracellular fluid of the infected tissues—e.g. the lung in pneumonia—and not in the bloodstream.

Bacteria may be destroyed or inhibited through a variety of mechanisms—for example, via blockage of the synthesis of the cell wall (penicillins), or inhibition of bacterial protein synthesis (erythromycin, chloramphenicol). Bacterial metabolism differs sufficiently from that of human cells to permit this type of selective interference while sparing the host cells.

Unlike bacteria, viruses are obligate intracellular parasites which utilize the metabolic processes of the invaded host cells for their reproduction. Therefore, agents which interfere with viral metabolism are also likely to injure host cells. It is this fact which is the primary obstacle to the development of selective antiviral agents, and which makes the apparent efficacy of ara-A so remarkable.

Scott A. Reines M.D., Ph.D.  
Bronx, N. Y.

**Your Friendly Dentist**

Granted many people have a fear of dental treatment. The study of Kleinknecht and Bernstein (SN: 9/10/77, p. 170) failed to mention that most parents bring their children to the dentist for the first time after the child is suffering from a toothache. They are often preconditioned by the parent in terms of—"He won't HURT you"!

A dentist has to work in a very intimate relationship on one of the most sensitive areas of the body. No wonder many sensitive children react unfavorably.

Organized dentistry is not only stressing improved communication skills, but also a public education program to improve the dental health of people in this country.

Alfred C. Heston, D.M.D.  
Spokane, Wash.

U.S. POSTAL SERVICE STATEMENT OF OWNERSHIP, MANAGEMENT AND CIRCULATION (Required by 39 U.S.C. 3685)			
1. TITLE OF PUBLICATION SCIENCE NEWS	2. ISSUE DATE October 10, 1977	3. FREQUENCY OF ISSUE Weekly	4. ANNUAL SUBSCRIPTION PRICE \$12.50
5. LOCATION OF ANNUAL OFFICE OF PUBLICATION (Street, City, County, State and ZIP Code) (Not printer)			
6. LOCATION OF THE HEADQUARTERS OR GENERAL BUSINESS OFFICES OF THE PUBLISHERS (Not printer)			
7. NAMES AND COMPLETE ADDRESSES OF PUBLISHER, EDITOR, AND MANAGING EDITOR			
8. OWNER (If owned by a corporation, its name and address must be stated and immediately thereunder the names and addresses of stockholders owning or holding 1 percent or more of total amount of stock. If not owned by a corporation, the names and addresses of the individual owners must be given. If owned by a partnership or other unincorporated firm, its name and address, as well as that of each individual must be given.)			
9. KNOWN BONDHOLDERS, MORTGAGEES, AND OTHER SECURITY HOLDERS OWNING OR HOLDING 1 PERCENT OR MORE OF TOTAL AMOUNT OF BOND, MORTGAGES OR OTHER SECURITIES OF THIS OR ANY OTHER			
10. FOR COMPLETION BY NONPROFIT ORGANIZATIONS AUTHORIZED TO MAIL AT SPECIAL RATES (Section 132 (b), 136 (b)) (The purpose, function, and nonprofit status of this organization and the exempt status for Federal income tax purposes (Check one))			
11. EXTENT AND NATURE OF CIRCULATION (If changed, publisher must submit explanation of change with this statement)			
A. TOTAL NO. COPIES PRINTED (Net Press Run)	B. AVERAGE NO. COPIES EACH ISSUE DURING PRECEDING 12 MONTHS	C. ACTUAL NO. COPIES EACH ISSUE DURING PRECEDING 12 MONTHS	D. FILING DATE
1. PAID CIRCULATION a. SALES THROUGH DEALERS AND CARRIERS, STREET VENDORS AND COUNTER SALES	2. MAIL SUBSCRIPTIONS	3. TOTAL PAID CIRCULATION (Sum of 1B and 2B)	
4. FREE DISTRIBUTION BY MAIL, CARRIER OR OTHER MEANS, SAMPLES, COMPLIMENTARY, AND OTHER FREE COPIES	5. TOTAL DISTRIBUTION (Sum of 3C and 4D)	6. OFFICE USE, LEFT-OVER, UNACCOUNTED, SPOILED, OTHER PROFITS	7. RETURNS FROM NEWS AGENTS
8. TOTAL (Sum of 5, 6, and 7) and 2nd-class equal net press run shown in 11A	9. SIGNATURE AND TITLE OF EDITOR, PUBLISHER, BUSINESS MANAGER, OR OWNER	10. I certify that the statements made by me above are correct and complete.	
11. FOR COMPLETION BY PUBLISHERS MAILING AT THE REGULAR RATES (Section 132 (b), 136 (b)) (Check one)			
39 U.S.C. 3625 provides in pertinent part: "No person who would have been entitled to mail matter under former section 4226 of this title shall mail such matter of the type provided under this section unless he has actually with the Postal Service a written request for permission to mail matter at such rate."			
The qualifications for the privileges of this section, if freely required, permission to mail the publication named in item 11 at the special postage rates provided authorized by 39 U.S.C. 3625.			
SIGNATURE AND TITLE OF EDITOR, PUBLISHER, BUSINESS MANAGER, OR OWNER			

**SCIENCE SERVICE**

Institution for the public understanding of science founded 1921; a nonprofit corporation.  
**Board of Trustees** Nominated by the AMERICAN ASSOCIATION FOR THE ADVANCEMENT OF SCIENCE: **Deborah P. Wolfe**, Queens College of City University of New York; **Bowen C. Dees**, The Franklin Institute; **Athelstan Spilhaus**, National Oceanic and Atmospheric Administration. Nominated by the NATIONAL ACADEMY OF SCIENCES: **Gerald F. Tape** (Vice President), Associated Universities; **Allen V. Astin**, Bethesda, Md.; **Glenn T. Seaborg** (President), University of California, Berkeley. Nominated by the NATIONAL RESEARCH COUNCIL: **Gerald Holton**, Harvard University; **Joseph W. Berg Jr.**, National Research Council; **Aaron Rosenthal**, Washington, D.C. Nominated by the JOURNALISTIC PROFESSION: **Edward Bliss Jr.**, Newburyport, Me.; **Julius Duscha**, Washington Journalism Center; **O.W. Riegel** (Secretary), Glasgow, Va. Nominated by E.W. SCRIPPS TRUST: **Milton Harris** (Treasurer), Washington, D.C.; **Edward W. Scripps II**, Edward W. Scripps Trust; **John Troan**, Pittsburgh Press.  
Director: E.G. Sherburne Jr.; Assistant Director: Dorothy Schriver; Business Manager: Donald R. Harless; Things of Science: Ruby Yoshioka.
