

"Your 2-inch Unitron," exclaimed Galileo, "makes my telescope look like a mailing tube."

First of all, he couldn't believe that you could buy the 2-inch Unitron altazimuth refractor for less than \$200. But you can. Complete, ready to enjoy, and with all the superb quality you expect from Unitron.

The old astronomer was astounded at the Unitron optics: an achromatic, air-spaced coated objective with a two-inch aperture and 700mm focal length. A focal ratio of f/14, resolving power 2.3" and magnitude reach 10.3.

"Nothing like this in my time," he said, looking at the two coated eyepieces that come with the 2-inch Unitron. One of them is a 25mm-focal length Ramsden-type, with 28x magnification. The other, 9mm, achromatic symmetrical, 78x.

He was particularly intrigued by the viewfinder. "I didn't have one," he muttered. The Unitron 4x, 19mm view

finder with a crossline eyepiece is mounted in brackets with thumb screws for precise alignment.

"I had trouble locating objects," the pioneer astronomer pointed out, admiring the altazimuth mounting, with its slow-motion controls for both axes, and the sturdy adjustable tripod. He found it hard to believe that a precision rack and pinion focusing mechanism and a star diagonal are included at that remarkably low price. And that Unitron has a full range of optional accessories. "Accessories?" he asked, "What are accessories?"

After we showed him, Galileo carried off his 2-inch Unitron, promising to return it some day. We don't think he'll ever want to part with it. Neither will you. The Unitron 2-inch at less than \$200. There's one waiting for you at your Unitron dealer.

Gifts That Run Hot & Cold MAX-MIN THERMOMETERS Record Temperatures in °F and °C

#7413

This Max-Mini thermometer with two scales simplifies the coming change-over to the Metric system. The present temperature is easy to read accurately at the jet black pointer. It moves the red Max and Min indicators along as the temperature rises and falls. They always show the hottest and coldest experienced. To reset them just rotate the stem below. Beautiful red, white, and blue case 2 3/4" diameter. With mounting bracket. Thermometer #7413 sent postpaid \$7.50 each, 3 for \$18.50. New York residents add sales tax. For °F only scale specify #7410.

GIANT MAX-MIN THERMOMETER

Easily readable 12" diameter with dual °C and -40 to 120° F scales. White face with red temperature indicator and resettable max and min indicators. #7470 sent postpaid \$16.95. #7470

HUMIDITY INDICATOR

Wet & dry bulb thermometers give room temperature and humidity computation on hinged front face. Case 4" x 10" includes water reservoir. #7438 sent postpaid \$9.40. #7438

COME, JOURNEY THROUGH THE UNIVERSE

WITH THE ASTROSCAN 2001

A TELESCOPE LIKE NO OTHER

Now you can personally explore the heavens with the most innovative astronomical instrument ever designed. It's Astroscan 2001, a unique new telescope built by Edmund Scientific Co., a leader in astronomy for over 35 years.

Take Your Entire Family on a Fantastic Visual Voyage

The Astroscan 2001 gives you a window on a world beyond that which you have ever known! You'll see light from distant suns which began traveling to our Earth long before you were born. You'll see star clusters, double stars, nebulae, the planets — the full celestial display of the night sky.

You'll see the moon in crisp, clear detail. It's an inspiring, awesome experience you can enjoy for a lifetime!

Engineered in the Edmund Scientific Laboratories

Edmund Scientific has devoted more than two years of concentrated engineering and product development to produce this special instrument. Our objectives were simple but challenging. The newest Edmund Scientific telescope had to: • give bright, clear views of the stars, the planets, the moon • be light weight for extreme portability; convenient for hikes, bike trips, vacations • be simple to set up and use so anyone, even a young child, could enjoy the exciting hobby of astronomy • and, most important, *be affordable!*

The result of this intensive program is Astroscan 2001, a telescope so different and so precise even professional astronomers have raved about it. And at just \$149.95 it's one of the best telescope buys available.

Astroscan — A "Richest Field" Telescope

The 2001 is a classic Newtonian reflector telescope, using the same basic optical design as the largest observatory instruments. Light from distant celestial objects enters through an optically-coated window, is reflected and focused by a 4¼" highly-polished *parabolic* mirror, reflected onto a secondary flat-surfaced mirror and through a 28mm magnifying eyepiece, to your eye. The fine optics in Astroscan are equal to most found in the world's best cameras.

With the Astroscan's wide field you can see more stars and features in a single view than possible with most other scopes. And, Astroscan's amazing light-gathering ability permits views of stars so faint they're invisible to the naked eye.

Astroscan weighs just over 10 pounds and is only 17 inches long. The attractively styled 2001 body is ruggedly constructed of high-impact red plastic. Its uniquely designed

aluminum mount and fingertip focusing enables anyone to set up and use this fine instrument in minutes.

Tomorrow's Telescope You Can Own Today!

The Edmund Scientific Astroscan 2001 is now in full production and available for immediate shipment. You can order yours today with the coupon below. Use the Astroscan under the Edmund 30-day unconditional guarantee. Use the 2001 in your backyard, at the beach, in the mountains — anywhere. Experience the spectacular views awaiting you wherever you go. If you and your family are not completely satisfied with this exciting telescope, simply return it for a full refund. Expand your world today. Order now.

Owners report: "A good flexible instrument of this quality has been long overdue,"
"...has great overall design."
"The Astroscan 2001 is a very complete telescope."
