

# DNA The Blueprint of Life

In 1895 American cytologist E. B. Wilson wrote, "... And thus we reach the remarkable conclusion that inheritance may, perhaps, be effected by the physical transmission of a particular chemical compound from parent to offspring."

Although Wilson's amazing insight into the nature of DNA was virtually ignored for almost 50 years we now know that this remarkable molecule is the physical basis of heredity. It is the "gene" . . . the "blueprint of all living things from bacteria to man."

Now you can obtain a specimen of highly polymerized DNA embedded in a beautiful, crystal clear lucite block measuring 3 1/4" x 2 1/4" x 1". A truly unique gift idea or conversation piece, it can also serve as a valuable teaching aide at any grade level. It comes gift-boxed with an interesting explanatory booklet.

Send check or money order for \$9.95 plus \$1.25 for postage and handling. If you are not completely satisfied simply return within 10 days for a full refund.

## Psychological Problems in the Father-Son Relationship

by

Harold A. Abramson, M.D.

A series of verbatim recordings of psychoanalytic interviews in a patient with eczema and asthma.

James A. Knight, M.D., Associate Dean and Professor of Psychiatry at Tulane University, in his review says: *His comments and interpretations for the reader are given at strategic points, psychotherapy enabled this chronically ill young man who had disabling eczema, asthma and depression to achieve independence.*

M. Murray Peshkin, M.D., President of the Asthmatic Children's Foundation, states: *The importance of the father-son relationship is emphasized throughout, and the reader will be rewarded with a firsthand compelling view of the psychotherapeutic process.*

**MAGNIFICATIONS** is a book of 103 photographs taken with a scanning electron microscope of objects magnified from under 100 times to 1900 times. Plant life, animal life, and inorganic objects are now seen as never before. Traditionally, specimens were gold plated as dried, subjecting them to trauma—altering or destroying their surfaces. David Scharf's photographs eliminate the "fixing" stage and thus record "living" organisms. The result is a new visual experience, presenting details and structures of forms in nature not previously reproducible. This marriage of science and art will be useful to the biologist, the botanist, the zoologist, the artist, the physiologist—to all who are interested in the forms of nature. A valuable resource for school and college libraries.

## An American Indian child needs you as a sponsor and personal friend...

You have it within your power to lift an Indian child like this young girl from the despair of appalling poverty to a brighter life of hope and joy and personal pride.

Judy was poor, lonesome and apprehensive when she arrived at school in Arizona last fall. Only threadbare clothes on her back. No winter coat. No money. Not even a toothbrush.

Fortunately we were able to find her a sponsor . . . someone like yourself who provided basic needs to help keep her in school: supplies, personal items, a little spending

money . . . things that are simply beyond the economic means of many Indian parents. There are hundreds more like Judy who need shoes, gloves, sweaters, jeans, and just plain love and concern so that going to school is a joyful experience, not one of humiliating hardship.

Decide now to become a Futures for Children sponsor of just one boy or girl who needs your help. What a boost it will be for "your" child to have someone who cares, someone to write to, someone to love. Please fill out the coupon and mail it today.
