CELLS IN CULTURE

Explore new worlds with Scribners

THE INNER PLANETS

New Light on the Rocky Worlds of Mercury, Venus, Earth and Mars
By Clark R. Chapman. The history of the inner planets from the time of stargazers to the age of Viking and Mariner satellites. "Thoroughly readable...the most up-to-date portrait of the four inner planets available." (*Bookviews*) \$7.95

SEX LIVES OF ANIMALS WITHOUT BACKBONES

By Haig H. Najarian. A fascinating introduction to the processes, styles and behavior associated with reproduction of animals without backbones. "There are few, if any, other books on this topic that are written as simply, accurately, and interestingly." (*The Science Teacher*) \$6.95

THE A-Z OF ASTRONOMY

By Patrick Moore. Over 400 entries and 100 illustrations, covering classical and modern astronomy, with descriptions of celestial bodies, scientific instruments and principles, biographies of noted astronomers and definitions. "Should find a home on the bookshelves of many students...The cross-reference network is excellent. Explanations are clear. Illustrations are numerous and helpful." (*Booklist*) \$7.95

ELUSIVE TREASURE

The Story of Early Archaeologists in the Americas
By Brian Fagan. A survey of pre-1900 archaeological exploration of the Americas, from the earliest speculations on the origin of the American Indian to the beginnings of scientific archaeology. Portraits, lithographs, artifacts and site photographs. "A colorful account...archaeology buffs...will enjoy this book." (*Sci/Tech Book News*) \$17.50

THE YEAR OF THE DINOSAUR

By Edwin H. Colbert. A realistic depiction of the life of a brontosaurus, how she lived and what she confronted on earth 150 million years ago. Using scientific facts and speculation, this book provides a fascinating, well-illustrated account of man's predecessor on earth. "A readable, up-to-date picture...by the best known of the traditional paleontologists." (*Kirkus Reviews*) \$9.95

THE YEAR OF THE KANGAROO

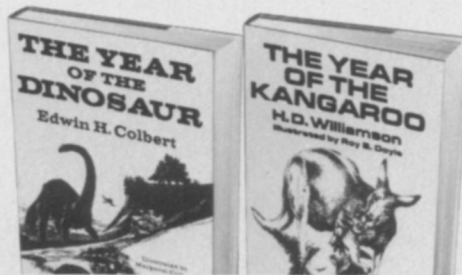

By H.D. Williamson. A month-by-month narrative about the daily lives of a traveling band of kangaroos, their behavioral patterns, why they react the way they do to dangerous situations and the part their distinctive biology plays in their lives. "Detailed in its coverage...successfully captures the character of the Australian outback country." (*Library Journal*) \$9.95

THE NATURAL HISTORY OF TERMITES

By Frances L. Behnke. A comprehensive look at the highly developed social structure of the termite family and the termite's ecological importance to our environment. "Excellent, well-illustrated introduction...written for serious readers; its text is up-to-date and its many line drawings are particularly instructive." (*Scientific American*) \$6.95

PLAGUE!

The Shocking Story of a Dread Disease in America Today
By Charles T. Gregg. The very word "plague" conjures up the Black Death of the Middle Ages, when millions perished. But plague, in all its virulent forms, exists in America today, and an epidemic could occur. This book tells the story of plague, and its horrifying manifestations, and gives a chilling account of the possibilities for its recurrence today. "Should both fascinate and horrify the lay reader." (*Publishers Weekly*) \$12.50

THE RAPE OF THE NILE

Tomb Robbers, Tourists and Archaeologists in Egypt
By Brian M. Fagan. The looting which led to the destruction and scattering of the relics of ancient Egyptian civilization and finally to the scientific discipline of modern archaeology is explored in this lavish work. "Entertaining and splendidly illustrated." (*Science Digest*) \$7.95

ADVENTURES OF A MATHEMATICIAN

By S.M. Ulam. A witty, very human autobiography by one of the world's greatest living mathematicians. "Readers owe Ulam a debt for a book of reminiscent perceptions that have rarely been matched...What he tells us of his mind and his times is fascinating." (*Scientific American*) "Remarkable...and you don't even need algebra to understand it." (*The New York Times*) \$4.95

PORTRAIT OF NATURE

The World as Seen by Modern Science
By Alan Cottrell. In completely understandable language, the author leads the reader through the physics, chemistry and biology of the universe. "An extraordinary book...exquisite." (*American Scientist*) "A major achievement...will rank with the very best of the classic science books." (*Times Literary Supplement*) \$4.95

EXPLORING THE GALAXIES

By Simon Mitton. A classic work exploring the exciting discoveries of structure, distribution, origin and evolution of the galaxies within a rapidly expanding universe. "A pleasure to read...But more than that, a competent guide...to the fascinating exploration of the largest coagulations of matter within our universe." (*American Scientist*) \$4.95
