DYING TO BE AMERICAN

Let your child in on a world of wonder: Things of Science.

The how and why of science is always stimulating to the inquiring minds of children, and THINGS of science is just the "thing" to help satisfy this curiosity and search for knowledge. THINGS of science kits contain an explanatory booklet and simple materials for easy-to-do experiments that make science a "fun activity."

The kits are designed for young people from 10 to 16, but many parents buy them for interested younger children. They are ideal for an afternoon project, scout meetings, neighborhood clubs and playground activities.

Illustrated on this page are THINGS of science kits, normally obtained on a subscription basis, now being offered at \$1.50 each or three for \$4.00 while the supply lasts.

THINGS OF SCIENCE, Dept. D108
1719 N Street, N.W.
Washington, D.C. 20036

<input type="checkbox"/> Solar Energy	<input type="checkbox"/> Pendulum	<input type="checkbox"/> Symmetry

COME, JOURNEY THROUGH THE UNIVERSE

With The New Telescope That's Popularizing Astronomy

The amazing popularity of motion pictures such as Star Wars and Close Encounters and TV programs like Star Trek, Space 1999 and Logan's Run confirm the fact that Americans are looking skyward as never before. Astronomy is the *NEW HOBBY* of the 70's!

And now there's good news for would-be space watchers. It's Edmund Scientific's new Astroscan 2001, an unusual looking, unusually effective, unusually *inexpensive* telescope anyone can use to get into this exciting hobby. The Astroscan 2001 gives you a window on the world beyond that which you have ever known.

We've devoted more than two years of concentrated engineering and product development to produce this special instrument. Our objectives were simple but challenging. The newest Edmund Scientific telescope had to: • give bright, clear views of the stars, the planets, the moon • be lightweight for extreme portability; convenient for hikes, bike trips, vacations • be simple to set up and use so anyone, even a young child, could enjoy the exciting hobby of astronomy • and, most important, be affordable!

The result of this intensive program is Astroscan 2001, a telescope so different and so precise even professional astronomers have raved about it. And at just \$149.95 it's one of the best telescope buys available.

The 2001 is a classic Newtonian reflector telescope, using the same basic optical design as the largest observatory instruments. Light from distant celestial objects enters

through an optically-coated window, is reflected and focused by a 4 1/4" highly-polished parabolic mirror, reflected onto a secondary flat-surfaced mirror and through a 28mm magnifying eyepiece, to your eye. The fine optics in Astroscan are better than those found in the world's best cameras.

With the Astroscan's wide field you can see more stars and features in a single view than possible with most other scopes. And, Astroscan's amazing light-gathering ability permits views of stars so faint they're invisible to the naked eye.

Astroscan weighs just over 10 pounds and is only 17 inches long. The attractively styled 2001 body is ruggedly constructed of high-impact red styrene. Its uniquely designed aluminum mount and fingertip focusing enables anyone to set up and use this fine instrument in minutes.

The Edmund Scientific Astroscan 2001 is available now for immediate shipment. You can order yours today with the coupon below. Use the Astroscan under the Edmund 30-day unconditional guarantee. Experience the spectacular views awaiting you wherever you go. If you and your family are not completely satisfied with this exciting telescope, simply return it for a full refund. Expand your world today. Order now.

This Quarter Of The Universe Is OURS!

(A Handbook For Building Three Dimensional Starmaps)
Includes computer coordinate translations of the entire Gliese Near Star Catalogue of almost 2000 stars to 3D mode (X,Y,Z and top view Polar) in unit parsecs scale; 3D coordinate list for stars within 6 parsecs at 3" pc and unit parsec scale; 6 parsec exterior front view key; complete instructions and diagrams for building a beautiful 3 foot 3D map of the 80+ nearest stars within 6 parsecs; 3D list of the approx. 500 nearby stars with absolute magnitude of 6 or less; the working computer programme; general advices in starmap design. This exceptional book is the result of 5 years work. \$6 US ppd. ORDER FROM: THETA ENTERPRISES, Dept. SN, 829J Tejas Trail, Richardson, TX 75081.

MURPHY'S LAWS!

Incomparable "scientific" wit. Colorfully lithographed on 8" x 10" heavy Parchtext for framing. A great business or personal gift! Only \$3 (4/\$10). Four Corners Press, Dept. SAC, Hanover, Mass. 02339.

Tempted by the Apple's new low prices?

If you don't know an apple from a pear or if you're Gen-eral Widget's computer expert, Apple II is the personal computer for you - at new lower prices from \$995. Apple II performs complex business and scientific functions and has a great night life: carry it home and play the most razzle-dazzle videogames you'll ever see. Or balance a checkbook. Or control your environment. Apple II is designed to grow with an internal capacity of 4 to 8K RAM., 8 parallel I/O peripheral ports (printer, floppy, Selectric, communications modem), 2 available ROM ports, and an on-board analog to digital converter. The versatile Apple speaks 3 languages: Basic, Machine, and Assembly. If RAM's and ROM's don't shake your branches, consider this: Sometimes simplicity is the ultimate sophistication.
