**ARCHAEOLOGY OF THE BIBLE**—Magnus Magnusson — S&S, 1978, 239 p., color and b&w photographs and drawings, \$12.95. Archeological finds documented here in readable text and beautiful illustrations shed new light on the Old Testament, distinguishing myth and legend from actual historical events. The outcome of research for a BBC television documentary, the book was first published in 1977 under the title, *BC, The Archaeology of the Bible Lands*.

**GOD AND THE ASTRONOMERS**—Robert Jastrow — Norton, 1978, 136 p., color and b&w photographs, \$7.95. Traces the history of the big bang theory of the origin of the universe and tells of the scientists and their work that produced the evidence that the universe exploded into being. Discusses the problems scientists have with this theory and suggests possible ways our universe may end.

**HOME GUIDE TO SOLAR HEATING AND COOLING**—Jackson Hand—Har-Row, 1978, 183 p., photographs & drawings, paper, \$3.95. Explains the principles of solar energy utilization: how solar energy can be used in your home, how it is installed and how you can design and construct your own system.

**ICE OR FIRE?: Surviving Climatic Change**—D. S. Halacy, Jr. — Har-Row, 1978, 212 p., \$9.95. Investigates the possibility that we may be on the brink of a new ice age and considers our prospects for surviving such a wrenching change in the environment.

**OF WOLVES AND MEN**—Barry Holstun Lopez—Scribner, 1978, 309 p., illus., \$14.95. Presents what is known scientifically about the wolf, Eskimo and Indian conceptions of the wolf, the wolf in mythology, medieval science and literature and the continuing destruction of the wolf.

**THE SEX LIFE OF PLANTS**—Alec Bristow—HR&W, 1978, 228 p., drawings, \$10. The plant kingdom invented sex, says the author: Sex remains a mark of the higher forms of life, both in plants and animals. Discusses sexual organs and techniques in plants, sex taboos, plant pregnancy, virgin birth and sex problems.

**STARS AND NEBULAS**—William J. Kaufmann, III — W H Freeman, 1978, 204 p., illus., \$13; paper, \$7. Explores for the layman such fascinating subjects as mysterious radio signals from outer space, light years and time as the fourth dimension, the life of a star, the meaning of starlight and pulsars.

**THE VISIONARY EYE: Essays in the Arts, Literature, and Science**—J. Bronowski, edited by Piero E. Ariotti and Rita Bronowski—MIT Pr, 1978, 184 p., illus., \$10. The main emphasis is on the arts and humanities in these essays by Bronowski, who treated art and science as the same expression of the human imagination.
