# Three Exciting Offerings for the readers of *Science News*

## aha! Insight

Martin Gardner

What goes on in a person's mind when he or she solves an important problem with a single flash of insight? How does somebody come up with a short, elegant solution to a seemingly difficult problem? Psychologists call these hunches *aha!* reactions. They have no relationship to general intelligence, but they are closely connected to creativity in science, business, and everyday activity.

This book, by the author of the popular *Scientific American* column "Mathematical Games," offers puzzles that seem—and indeed are—difficult to solve by traditional methods, but which can be solved in an instant once the key, the *aha!*, is grasped. Added notes and comments show how these puzzles lead to significant aspects of modern mathematics.

1978, 179 pages, more than 100 illustrations

## Stars and Nebulas

William J. Kaufmann III

*Stars and Nebulas* explores and explains some of the mysteries of the night sky. It covers the visible and invisible spectrum of electromagnetic radiation; it traces the life of a star, from its birth, through maturity and old age, to its death; it follows the search for mysterious black holes in time and space. Accessible and entertaining, this concise guide requires no specialized knowledge of astronomy, only a basic human curiosity about the form and substance of the universe. Generously illustrated, *Stars and Nebulas* provides a fascinating overview of a timeless subject.

1978, 197 pages, 104 illustrations

SCIENTIFIC  
AMERICAN  
1979 CALENDAR

## SCIENTIFIC AMERICAN 1979 Calendar

Commemorating Over 200 Important Dates in the History of Science

- 13 striking illustrations from the pages of *Scientific American*, with detailed descriptions
- Full 12½" x 10½" wall size
- Limited quantities, order today.

The 1979 *Scientific American* Calendar is an informative and decorative complement to home or office. It also makes a handsome gift for friends or colleagues. For your copies of this unique calendar, mail the order today.
