Mapping Jupiter's Moons

STAR WORDS

Stars and Clusters

Cecilia Payne-Gaposchkin

This cosmic drama describes the lives of the stars that form our galaxy and the changes they undergo in their thousand-million-year-long lifetimes.

Since they can be viewed with the naked eye or a small telescope, a complete atlas of the stars and clusters is included in the book along with copious diagrams, drawings, and photographs.

Stars and Clusters will leave both amateur and professional astronomers star-struck. 230 illus., \$22.50

Source Book in Astronomy and Astrophysics, 1900-1975

Kenneth Lang and Owen Gingerich

This soon-to-be published addition to the distinguished Source Books series traces the development of astrophysics, records its achievements, and illuminates its history. 113 illus., \$50.00

The Milky Way

Fourth Edition, Revised and Enlarged
Bart J. Bok and Priscilla F. Bok

"The definitive book for understanding our galaxy—its origins, evolution, composition, and interactions."

—*The Science Teacher*

Cloth, \$15.00; paper, \$5.95.

Atoms, Stars, and Nebulae

Revised Edition
Lawrence H. Aller

"This astrophysical *tour de force* is strongly recommended... A superb sketch in clear, readable language of astrophysics today." —*Journal of the British Astronomical Association*
Paper, \$5.95

Our Sun

Revised Edition

Donald H. Menzel

"Completely revised... newly illustrated, and enlarged. A worthy addition to the excellent series."

—*Scientific American* \$15.00

Earth, Moon, and Planets

Third Edition

Fred L. Whipple

"Excellent... Now contains a wealth of fresh pictures... The text is frankly and winningly descriptive."

—*Scientific American*

Cloth, \$13.50; paper, \$3.95.

Galaxies

Third Edition, Revised by Paul W. Hodge

Harlow Shapley

"This book can be unreservedly recommended to all with an interest in galaxies, be they professionals or laymen." —*Contemporary Physics*

Cloth, \$14.00; paper, \$5.95.
