All books sent postpaid. Domestic orders only.

ASTRONOMY WITH BINOCULARS —

James Muirden — T Y Crowell, 1979, 156 p., illus., \$8.95. Tells what astronomical observations can be made with binoculars. Discusses solar, planetary, comet, meteor, aurora, star and constellation observations, in addition to observations of our natural satellite, the moon.

EUREKA!: An Illustrated History of Inventions from the Wheel to the Computer —

Edward De Bono, Ed. — HR&W, 1979, 248 p., color and b&w illus., paper, \$10. The important inventions throughout history — how they came about, who made them, and what effects they had. First published in the United States in paper in 1979.

THE MUSHROOM TRAILGUIDE —

Phyllis G. Glick — HR&W, 1979, 247 p., illus., \$9.95, paper, \$5.95. Describes in nontechnical language more than 400 edible mushrooms found in North America. Tells you which ones to eat, which to avoid and how to cook what you find. Beautifully illustrated with line drawings.

SPACE SHOTS: An Album of the Universe —

Fred Hapgood, Introduction by Michael Collins — Times Bks, 1979, 79 p., illus., paper, \$7.95. Magnificent color and black and white photographs with nontechnical explanations of the photographs of the earth, the moon, asteroids, comets, the planets, the sun, stars, nebulae, galaxies and quasars.

New and recent books about the moon

APOLLO: Ten Years Since Tranquillity Base —

Richard P. Hallion and Tom D. Crouch, Eds. — Smithsonian, 1979, 192 p., illus., \$17.50, paper, \$6.95. Essays that examine the political and social climate leading up to the moon landing, July 16, 1969, as well as the technological and scientific implications that resulted from it. Topics range from artists' views of the Apollo program to an in-depth look at the vehicles and equipment that made the mission possible.

GEOLOGY ON THE MOON —

J. E. Guest and R. Greeley — Wykeham (Crane-Russak Co), 1977, 235 p., illus., \$17.95. Concerned with what has been learned within the last 15 years about the processes that have produced the present face of the moon. The principal processes are meteoric impact and volcanism. Many photographs enhance the text.

THE MOON BOOK —

Bevan M. French — Penguin, 1977, 287 p., illus., paper, \$4.95. What we have learned from the Apollo program about our closest neighbor in space.

NEW GUIDE TO THE MOON —

Patrick Moore — Norton, 1977, 320 p., 16 plates, drawings, \$10.95. A lively description of the moon, its geography, geology and movements, enriched by the recent discoveries. For readers who want to travel there by telescope, spaceship or imagination.

PICTORIAL GUIDE TO THE MOON —

Dinsmore Alter, Revised by Joseph H. Jackson — T Y Crowell, 1979, 3rd ed., 216 p., illus., paper, \$6.95. This book includes beautiful photographs of the moon taken from earth, lunar orbiters and the surface of the moon, along with moon maps. Originally published in 1973 and now available in paper.
