A Piece of the Moon?

Meteorites known as Agni Mani, commonly called Tektites, have long been thought by some scientists to originate from the moon's surface. Now you can own one of these visitors from outer space in a solid sterling silver ring for \$34.50. These Tektites have been custom cut by a professional lapidist to produce a black stone that certainly will be a conversation piece. Makes a very special gift. Money back guarantee if not completely satisfied.

Send check or money order for \$34.50 plus \$1.00 shipping and handling. State ring size and whether stone is to be rough cut showing features of meteorite or polished to smooth finish.

INTRODUCING... the watch that's light years ahead.

The NEW Solar Alarm—Chronograph Stopwatch

A personal alarm system, with chronograph functions, powered by light.

only
\$49.95

- Light energized
- Electronic quartz accuracy
- Month-date display
- 24 hour alarm
- Stopwatch functions

Probably the most efficient time piece ever designed

In an age of electronic gadgets and space age gimmicks, Cambridge International has designed a watch that brings modern technology back down to earth. No whistles and bells to inflate the price. In fact, this LCD Solar Alarm Chronograph dares to be different by offering you a highly precise, no-nonsense time piece without a lot of costly frills. Instead, you get the performance and accuracy you really need with the functions that are truly needed today.

Forget about battery replacement

You see, the Solar Alarm Chronograph actually harnesses the power from the sun and ordinary light and transforms it into the energy needed to operate this time piece plus recharge special designed micro-energy cells. A mere 15 minutes of exposure to light, energizes the solar cells for 24 hours!

Unbeatable quartz accuracy

The astonishing accuracy of this precision timepiece is regulated by its finely-tuned quartz crystal. It actually provides timekeeping accuracy to within 5 seconds per month! And because there are no moving parts to wear out or replace, you'll be enjoying this reliable solar-powered timepiece for many years to come.

8-Way Precision Accuracy

This highly distinctive timepiece utilizes the very latest micro technology to offer you time keeping precision 8 different ways. The big, easy-to-read LCD display constantly shows you the exact hour, minute, second and day. A touch of the command button will change the read-out to the month, date and day. Or you may select the stopwatch mode which displays the running seconds to 1/10 second up to 10 hours. In this mode, it is a lap timer and can be stopped and started without affecting the regular time accuracy. A feature that is perfect for timing phone calls, sports events or your own exercising program. Another touch highlights the display for easy viewing at night or under diminished light conditions.

The Personal Reminder System

The most unique function of this solar chronograph, is the easy-to-set 24 hour alarm system. It sounds with a pleasant electronic beep precisely at the pre-set time. Your own personal alarm system will automatically beep you at the right time for "on-time" punctuality, so important with today's busy schedules.

A Special Warranty

As dramatic evidence of our confidence in this timepiece of the future, Cambridge International and the manufacturer, Norwalk Electronics (who manufacture and design watch modules on a world wide basis) are offering a 10 year warranty on the solar cells, a 5 year warranty on the rechargable micro energy cells made by Mallory and a 1 year warranty on the quartz mechanism.

Test it for 2,592,000 seconds

Take 30 days (2,592,000 seconds) to test the accuracy and utility of this precision timepiece. If you find this chronograph does not live up to your own high standards, return it for a full refund. It's that easy.

If you have been looking for that special timepiece of the future, here is your chance! A Solar Alarm-Chronograph, without gimmicks, but all the features you'll ever need in a watch.

An Extra Special Value

Cambridge International purchases this unique timepiece for world wide distribution directly from the manufacturer. Because of these special marketing arrangements, we are able to offer this Solar Alarm Chronograph for only \$49.95 each plus \$2.95 shipping and handling. Quite an exceptional value for a timepiece of this quality. Available in silver or gold tone with fashion flex band that is truly adjustable for extra small or extra large wrists. Ultra-thin design, rugged shock proof engineering and water resistant construction.

NOTE: Due to our international sales of this watch, it has been designed with one extra feature—24 hour (military) time and continental date display.
