

"I'll show you HOW TO DO
**IMPORTANT
MATH** on your
**SCIENTIFIC
CALCULATOR**
in just 10 days!"

- Solve Equations
- Use Algorithms
- Differentiate
- Find Limits
- Sum Series
- Integrate

Step up your math skills fast — thousands already have — by using my new method in guidebook form. It's called *CALCULATOR CALCULUS* and comes with this guarantee: If after 10 days you're not astounded at the problems you're solving on your own calculator, return the guidebook for an immediate refund.

But the point is - you won't want to send it back. For this is the *easiest, fastest shortcut ever!* The day you receive your copy in the mail you'll want to put it to work. It's that exciting and helpful.

My name is Dr. George McCarty. I teach math at the University of California. I wrote this guidebook to cut through the confusion. It does just that—with worked-out examples, simple exercises and practical problems—all designed to work on your calculator!

If you're in the biological, social or physical sciences, you'll be doing carbon dating, growth curves, half-life, marginal costs, motion, cooling, probability, pressure—and plenty more—using powerful numerical techniques, including differential equations.

For a limited time you can invest in *Calculator Calculus* for only \$14.95 plus \$1 handling (tax-deductible for professionals). Calif. add 90¢ tax. Send me your name and address with check or money order today. Thank you!

BOOKS

BOOKS is an editorial service for readers' information. To order any book listed or any U.S. book in print please remit retail price, plus 50¢ handling charge for each book to **Book Order Service**, Science News, 1719 N Street, N.W., Washington, D.C. 20036. All books sent postpaid. Domestic orders only.

BIRDS: Readings from SCIENTIFIC AMERICAN — Introduction by Barry W. Wilson. Contains 25 articles about birds published since 1948. These articles are grouped into six sections, each covering a different aspect of bird life, and one section dealing with birds' relationship with human beings. W.H. Freeman, 1980, 276 p., color and b&w illus., \$17.95, paper, \$8.95.

BUILD-IT-YOURSELF NATURAL ENERGY SOURCES: Solar, Wind and Water Power Made Easy — Richard E. Pierson. To help you build your own solar energy power system in the most economical way. Included are designs, parts, lists and detailed instructions. Originally published in hardback as *Technician's and Experimenter's Guide to Using Sun, Wind and Water Power*. Parker (P-H), 1979, 268 p., illus., paper, \$3.95.

THE CAMBRIDGE ENCYCLOPEDIA OF ARCHAEOLOGY — Andrew Sherratt, Ed. A comprehensive review of archaeology on a global scale using a thematic approach, with each chapter written by a specialist in the region and period. This beautifully illustrated volume gives a worldwide account of the emergence of the human species up to the expansion of medieval Europe. Crown/Cambridge U Pr, 1980, 495 p., color and b&w illus., \$35.

THE COMPLETE GUIDE TO ALL CATS — Ernest H. Hart and Allan H. Hart. Written for the house pet owner, the cat breeder and the cat-show enthusiast. Covers such topics as training, genetics and breeding, kitten care, showing, feline physiology, cat diseases and the geriatric cat, as well as the feline in folklore and art and the history and evolution of the cat. Scribner, 1980, 318 p., illus., \$14.95.

EXPLAINING EMOTIONS — Amélie Oksenberg Rorty, Ed. An anthology presenting papers from several disciplines. The authors take the point of view that emotions are not irrational feelings, disturbances or responses to disturbances. They assume that emotions play an important part in our lives and that having an emotion can be not only functional but also informative. U of Cal Pr, 1980, 543 p., \$28.50, paper, \$7.95.

GREGORY BATESON: The Legacy of a Scientist — David Lipset. A biography of this distinguished anthropologist and social scientist that traces his intellectual evolution. Portrays both the personal and scientific dimensions of his life against the historical and cultural movements of his time. P-H, 1980, 360 p., illus., \$16.95.

THE JOURNAL OF THE NEW ALCHEMISTS, No. 6 — The New Alchemy Institute. The New Alchemy Institute is a small international organization concerned with appropriate technology, particularly the development of ecologically derived forms of energy, agriculture, aquaculture and housing. Greene, 1980, 184 p., illus., \$15.95, paper, \$9.95.

LSD: My Problem Child — Albert Hofmann. The chemical that has provided a key to the human mind is discussed candidly and with philosophic insight by the well-known biochemist who discovered it. McGraw, 1980, 209 p., \$9.95.

THE MEASUREMENT OF HUMAN AGGRESSIVENESS — G. Edmunds and D. C. Kendrick. Discusses the theories of aggression and the methods available to the psychologist in the measurement of aggression, aggressiveness and hostility. Presents the authors' research in attempting to validate a test of aggressiveness. Examines how the stable personality factors of aggressiveness and hostility may not be predictive of aggression. Wiley, 1980, 223 p., \$27.95.

METRIC MANUAL — Lawrence D. Pedde et al. The system of measurement adopted by the United States in 1975 is called the International System of Units, abbreviated SI in all languages. This book, originally published in 1978 by the U.S. Department of Interior, Bureau of Reclamation, presents the basics of SI, metric conversion techniques, engineering applications, examples of conversion, engineering problems and formulae using SI units. Grand River Bks(Gale), 1980, 278 p., \$22.

MINIATURE ORCHIDS — Rebecca Tyson Northen. Describes for those who have not grown orchids before the basic needs of these flowers and successful ways of caring for them; discusses common problems and their solutions. Miniature orchids are ideal for apartment dwellers and home owners without a greenhouse. Hundreds of species are described in detail and illustrated. Van Nos Reinhold, 1980, 189 p., color and b&w illus., \$26.95.

THE REDISCOVERY OF THE EARTH — Lloyd Motz, Ed. In the sixties and the seventies we "rediscovered" our planet — we have looked back on it from outer space and have been able to compare it with other heavenly bodies. This beautifully illustrated book is a collection of articles focusing on various aspects of planetary activity from the viewpoint of scientists working closely with the new ideas that have emerged in the area of geology in the last few years. Van Nos Reinhold, 1980, 279 p., color and b&w illus., \$35.
