

# FROZEN STIFF?

Wherever the winters are cold, with temperatures in the "teens" and "wind-chill factors" even lower, people are talking about Damart Underwear.

And no wonder! Damart is the unique underwear that keeps you amazingly warm, dry and comfortable no matter how cold it gets, no matter how hard the wind blows. No matter how long you stay out! You'll have to run your fingers over Damart Thermolactyl to discover how soft it is! You'll be thrilled at Damart's light weight that lets you move so easily.

Damart does this with a new miracle fabric—Thermolactyl. It's knitted to let *perspiration out!* No other underwear does this! You can wear Damart indoors too, and turn your thermostat into the 60's. You'll feel perfectly comfortable and enjoy dramatic savings in home heating costs.

Damart is so comfortable that the Mt. Everest climbing expedition wears it. So does the Chicago Bears Football Club, New England Patriots and Philadelphia Eagles.

Our free catalog tells the full Damart Thermolactyl story and displays the whole Damart line for men, women and children *including tall sizes*. Send for your FREE copy now!

THE PROOF IS IN THE WEARING!

# GARDENING BREAKTHROUGH

*A new miniature greenhouse system requires no installation or artificial heat and protects your plants down to 22°*

It's a miniature greenhouse system. You can now grow vegetables months earlier this year with a greenhouse system so practical it doesn't require installation or artificial heat--even when it's 10° below freezing.

I've been growing vegetables for 24 years. I've tested every kind of greenhouse for home gardening. And just like you I've been alarmed at the cost of building and heating a greenhouse. But now I've found a miniature greenhouse system that needs no installation, yet protects plants down to 22° without using artificial light or heat.

It's true! I've grown vegetables in freezing cold weather when I've used these miniature greenhouses. Without artificial heat I've grown vegetables months ahead of outdoor growing seasons. With GUARD 'N GRO I've grown cool weather crops like carrots, spinach and lettuce when it's too cold to grow anything outside. Without any installation these miniature greenhouses have protected my plants down to 10° below freezing. And now to help my friend who invented GUARD 'N GRO I want to tell gardeners everywhere about this superb gardening system.

*Energy-Saving Double Wall Construction. Even on cold cloudy days, thermal air cells sealed between each GUARD 'N GRO panel traps and seal in solar heat to provide a constant warm climate for your plants.*

## DEVELOPED IN CALIFORNIA

These miniature greenhouses were developed in California by my friend who named them GUARD 'N GRO. He spent years testing every possible kind of solar enclosure on plants and watching the plants react to each enclosure. From these years of testing he developed GUARD 'N GRO, the miniature greenhouses with sealed in thermal air cells.

When he sent GUARD 'N GRO to me I tried them on plants in freezing cold weather. GUARD 'N GRO kept my plants growing even in 22° cold. Soon my friend started selling GUARD 'N GRO to gardeners in other states.

It has produced superb results in Minnesota, Michigan, Colorado and Iowa. 2,000 GUARD 'N GRO systems are being used by gardeners in 46 states.

Last winter I gave GUARD 'N GRO to expert, experienced gardeners to test for themselves. They reported "We don't believe it but it's true, GUARD 'N GRO protected plants down to 22° without artificial light or heat." That's what hard boiled experts say.

But even more important to you is what other average gardeners say. Here's a typical letter...from Mrs. Ruby Schultz of Tucson, Arizona. "Last winter I put my geraniums and tender plants in our GUARD 'N GRO...it was freezing cold - at least 18° to 20° above zero. I like GUARD 'N GRO very much. We have a larger greenhouse, but it gets cold in the winter as it is not insulated - it has to be heated in cold weather."

*The basic GUARD 'N GRO unit is 42" long x 18" wide x 21" tall. Extensions that add another 40" to each unit let you connect individual units together. You can expand GUARD 'N GRO to six, nine or twelve feet...or as long as you like.*

GUARD 'N GRO is different from any cold frame or greenhouse you've ever used. It folds flat for storage, sets up anywhere outdoors and doesn't require installation. Without using artificial heat each unit creates a dependably warm growing environment even when it's 10° below freezing outside.

*Your entire garden can be protected by the GUARD 'N GRO system when you join individual units together.*

Think what this means to you! Now at last you can grow your own vegetables weeks, even months earlier this spring. You can protect your plants from killing frosts, freezing cold, hail and sleet...and never spend a penny for greenhouse heating or lighting. You can extend your growing season at least 4 weeks, spring and fall. You can grow cool weather crops like lettuce, carrots, broccoli, spinach, beets, Brussels sprouts, cauliflower, onions and broad beans, and do away with buying these vegetables at stores.

## QUALITY FEATURES

Don't confuse GUARD 'N GRO with those plastic "bag-like" greenhouses that puncture easily. GUARD 'N GRO is made of tough, shatterproof polypropylene...won't shatter, rip, or puncture. Patented, galvanized metal fasteners anchor GUARD 'N GRO against strong winds. Solar panels trap and seal in the sun's heat...keeps your plants warm even on overcast, freezing cold days

*Grow vegetables weeks, even months earlier this spring. GUARD 'N GRO - with its thermal air cells - keeps soil and plants warm and moist even in 22° temperatures. No installation, no artificial light and no artificial heat is needed. In 46 states GUARD 'N GRO is saving time and money for home gardeners. Now at last you can grow vegetables weeks, even months ahead of normal growing seasons...and never spend a penny for greenhouse heating, lighting or building.*

## NO RISK TRIAL

No longer do you have to wait until warm weather to enjoy vegetables from your garden. Order GUARD 'N GRO...the miniature greenhouse system that needs no artificial heat...on a trial basis. Then really test the system. Use GUARD 'N GRO anywhere you like...use it as often as you like...to prove it's plant growing powers.

See for yourself how GUARD 'N GRO creates an ideal growing climate for your plants. See how it traps and seals in the sun's heat...how it keeps plants warm and moist...even when it's 10° below freezing outside.

Use it to grow lettuce, carrots, spinach, beets, broccoli...most any cool weather vegetable you like to eat.

Put GUARD 'N GRO to every test. If you don't agree it's the greatest gardening breakthrough you've ever used...if it doesn't pay for itself many times over in the vegetables it gives you, you have used it entirely free. It won't cost you a penny.

## FREE BOOK

To get your GUARD 'N GRO system now, mail coupon below. Order now and receive free my 26 page gardening book. It's packed full of tips for year round gardening with the GUARD 'N GRO system. Don't delay. Supplies are limited. Mail the coupon now.
