Protect your car at home and work, rain or shine;
but beware, all car covers
are not the same...

Prevent "PREMATURE DEPRECIATION" because of oxidation and fading due to unnecessary exposure to rain, ice, snow, sun or salt.

Shelter your car

from Mother Nature's ruinous ways with custom-fitted,
Starshine Auto Shelters*!

Complete exterior and interior protection — in less than 1 minute! Starshine Auto Shelter's* improved and superior new fabric totally shields your vehicle from nature's single most damaging element...the SUN. Direct exposure will oxidize your paint, bake dirt and grime into the finish and fade the color. Plus, ultraviolet rays magnified by the windshield glass will cause your car's dashboard and other interior upholstery to crack, split, and fade as well. A Starshine Auto Shelter* will prevent all of these value-robbing losses from occurring. If used regularly, your Auto Shelter* will keep your car looking new, inside and out, for years to come.

Starshine Auto Shelter*...a revolutionary breakthrough in protective car cover fabrics. It is a remarkably improved blend of space-age textiles and natural fibers custom designed and manufactured to fit and thoroughly shield every automobile, truck, van or cycle — foreign or domestic. Each cover is individually tailored to fit your make of car as opposed to lesser quality, bulky "universal"

type cover-alls. Auto Shelter's* tight fit insures complete protection against high winds, and snow or rain will not get trapped underneath.

Water-resistant — not waterproof. Here's why: A "waterproof" cover traps moisture under the cover. This vaporized water can cause clouding of paint when the temperature is raised (from hot sunlight) and air circulation is eliminated by the cover. A beautiful finish can be ruined in a matter of hours. Taking this important factor into account, Starshine Auto Shelters* are purposely made to be effectively water and mildew resistant — a smart balance between potentially damaging "waterproof" covers and flimsy 100% cotton covers that quickly absorb most liquids, offering minimal protection. Starshine Auto Shelters* are also fully washable and wrinkle resistant.

In addition to eliminating unattractive oxidation and fading, your Auto Shelter* will protect your vehicle from the harmful effects of smog, industrial pollutants, sea and road salt, dust, sand, rain, snow, ice, sleet, tree sap, bird droppings, tar, etc. With the higher cost of new auto today it makes sense to protect your investment from these harmful elements.

■ No snow or ice-scraping this winter ■ Clean windows stay that way ■ Reduced chances of engine freeze-ups and dead batteries ■ Reduced maintenance, washing, painting, etc. ■ Minimized threat of vandalism and theft ■ Protection for your exterior shine, your interior upholstery, and your financial investment. ■ Free storage bag included ■ Special 2 Year Limited Warranty against tearing, fraying or losing its shape or water repellency!

Try a Starshine Auto Shelter* on your vehicle — at no obligation... Return it for a full refund within two weeks if not satisfied!

The Cold Spring Harbor Laboratory announces

Banbury Reports: A New Series in Biological Risk Assessment and Genetics

Over the past decade we have been witnessing an increased need for the advice of the geneticist in assessing the public health consequences of environmental factors that may lead to increased risks of cancer, as well as many other diseases whose origins lie in changes in DNA. To help bring together the worlds of genetics and biological risk assessment, the Cold Spring Harbor Laboratory founded in 1978 the Banbury Center, to organize, hold, and publish the proceedings of conferences of specialists from industry, regulatory agencies, and academia and governmental laboratories. Each such conference, attended by 25-35 persons, is to give rise to a Banbury Report.
