

BOOKS

BOOKS is an editorial service for readers' information. To order any book listed or any U.S. book in print please remit retail price, plus 50¢ handling charge for each book to **Book Order Service**, Science News, 1719 N Street, N.W., Washington, D.C. 20036. All books sent postpaid. Domestic orders only.

ALLERGIES & YOUR FAMILY — Doris J. Rapp. Discusses what an allergy is, how to recognize one, how to minimize allergic discomfort and difficulties. Tells how to handle practical everyday problems that occur with an allergic child, such as pets, travel, school, summer camp, sports and slumber parties. Sterling, 1980, 352 p., \$12.95, paper, \$5.95.

ANNUAL REVIEW OF NUCLEAR AND PARTICLE SCIENCE, Vol. 30 — J. D. Jackson et al. Eds. Includes articles that discuss such topics as the tau lepton and nuclei at high angular momentum. Annual Reviews, 1980, 604 p., illus., \$22.50.

BOUND FOR THE STARS — Saul J. Adelman and Benjamin Adelman. Surveys the major problems of solar system and interstellar space exploration and utilization — what is being done and what the authors believe can be done. P-H, 1981, 335 p., illus., \$17.95, paper, \$8.95.

COLORS FROM THE EARTH: The Artists' Guide to Collecting, Preparing, and Using Them — Anne Wall Thomas. Covers the range of earth tones, ochres, siennas, umbers and terres vertes, and shows how to use them in conjunction with both professional materials and common household products to create oil paints, watercolors, temperas, pastels, crayons and painting inks, as well as colored concrete, plaster and handmade paper. Van Nos Reinhold, 1980, 96 p., color/b&w illus., \$13.95.

COMBINED HEAT AND POWER: Whole City Heating — Planning Tomorrow's Energy Economy — W.R.H. Orchard and A.F.C. Sherratt. Papers from a conference on whole city heating held in London in November 1979. The authors identify technological and institutional factors that decision-makers should be taking into account. Some chapters refer specifically to solutions in one country, but many of the basic factors discussed will be found to apply worldwide. Wiley, 1980, 234 p., charts and graphs, \$59.95.

EARTH'S HISTORY, STRUCTURE AND MATERIALS: Readings from American Scientist — Brian J. Skinner, Ed. In these articles, scientists discuss their active, ongoing research in language understandable to the educated nonscientist. Topics examined are the earth as a planet, geologic time and how it is determined, plate tectonics and drifting continents and igneous activity. W Kaufmann, 1980, 179 p., color/b&w illus., paper, \$8.95.

ECONOMIC DEVELOPMENT — K. K. S. Dadzie et al. This material originally appeared as the September 1980 issue of *Scientific American* and is devoted to the economic development of Third World nations. Examines four major resources — people, food, water and energy — and four developing nations and looks at the world economy in the year 2000. WH Freeman, 1980, 132 p., color/b&w illus., \$13.95, paper, \$6.95.

THE ENCYCLOPEDIA OF ANCIENT CIVILIZATIONS — Arthur Cotterell, Ed. Richard Leakey's overview of the development of man is followed by the story of the birth and growth of civilized man in Egypt, Europe, India, West Asia, China and the Americas. Many scholars contributed to the description of these early civilizations — their cultures and societies. Mayflower Bks, 1980, 367 p., color/b&w illus., \$29.95.

THE ENERGY FACTBOOK — Richard C. Dorf. Compilation of information about uses of energy, sources of energy, energy conservation, economics and international factors. Intended for anyone who needs to make decisions that require information about energy supplies and uses. McGraw, 1981, 227 p., illus., \$16.95, paper, \$7.95.

FROM BEHAVIORAL SCIENCE TO BEHAVIOR MODIFICATION — Harry I. Kalish. To give the reader an appreciation for the relationship between the science of behavior and the application of behavioral principles and to provide an historical perspective of the studies and theoretical issues that form the basis of the techniques used in behavior modification. McGraw, 1981, 436 p., illus., \$19.95.

INTERTIDAL INVERTEBRATES OF CALIFORNIA — Robert H. Morris, Donald P. Abbott and Eugene C. Haderlie. For those who find the California seashore at low tide a place of beauty, wonder and interest and who want information on the common animals that live there. Color illustrations depict many of the animals and the text describes all those commonly found. Extensive bibliographies are included. Stanford U Pr, 1980, 690 p., color/b&w illus., \$30.

THE JOHNS HOPKINS ATLAS OF HUMAN FUNCTIONAL ANATOMY — Leon Schlossberg, Illustrator and Legends/George D. Zuidema, Text Ed. Striking illustrations in color are combined with text by the Johns Hopkins medical school faculty in this book designed to present basic anatomy, emphasizing function as well as structure, to students of medicine, allied health professionals and undergraduates. Also appropriate for the general reader interested in anatomy. Johns Hopkins, 2nd ed., 1980, 115 p., color/b&w illus., \$17.50, paper, \$10.95.

THE NEXT WHOLE EARTH CATALOG — Stewart Brand, Ed. This catalog is to inform those interested in self-reliance what is worth getting and where and how to do the getting. An item is listed if it is deemed useful as a tool, relevant to independent education, of high quality or low cost, or easily available by mail. Random, 1980, 608 p., illus., paper, \$12.50.

SCIENCE AT THE WHITE HOUSE: A Political Liability — Edward J. Burger, Jr., foreword by Don K. Price. A physician-scientist who worked in the Office of Science and Technology takes a critical look at the role of science advisers to the President. Recounts the many conflicts that occurred as science and politics converged. Johns Hopkins, 1980, 180 p., \$14.95.

SPACE — Anthony Feldman. A beautifully illustrated book covering the history of astronomy, our current knowledge of the origin of the universe, stars and galaxies, the solar system, extraterrestrial life in the universe, the UFO enigma and mysteries of space. Describes the achievements of space exploration and the future of man in space. Facts on File, 1980, 336 p., color/b&w illus., \$19.95.

TWINS ON TWINS — Kathryn McLaughlin Abbe and Frances McLaughlin Gill, text by Julie Szekely. An exploration of being twins, photographed by twins. Shows twins throughout history as they have been recorded in myth, paintings and photography, together with twins of today. Crown, 1980, 191 p., illus., \$17.95.

THE VIEW FROM THE EARTH 1981: A Simple Guide to the Night Sky and the Events that Will Happen There — Guy Ottewell. The purpose of this book is to show how to recognize the stars and planets that can be seen in the night sky month by month and to tell when to look for interesting celestial events throughout the current year. Published by the author, 1980, 33 p., illus., paper, \$4.

THINGS of Science

Since 1940 "THINGS" membership has stimulated inquiring minds with fun activities and learning about the wonders of science.

THINGS Kits are mailed each month with a booklet giving subject background, easy to follow instructions for demonstrations and experiments, and materials to use.

Designed for young people 10 to 16, parents often enjoy them too!

Ideas for science fairs—an interesting hobby—a help in deciding on a career—a gift that's for the whole year.

THINGS of Science
RD #1, Box 130S
Newtown, PA 18940

Please enter membership in THINGS of Science for 1 year—\$16. For 2 years—\$30. For each additional member, \$15 a year. Please send check or money order with application.

Send membership to:

If gift:

Name _____ Name of Donor _____

Address _____ Address _____

City _____ State _____ Zip _____ City _____ State _____ Zip _____

Send gift card to read from: _____

Thank You!

Outside USA, postage and handling, Canada and Mexico \$4, others \$6 a year each.
