TRACKING TINY TURTLES

The most comprehensive and useful
computer reference in the world.

- A mammoth volume covering everything from Access Methods to Working Set, in 1,523 pages, 470 articles and over 1,000 illustrations, tables and charts.
- Authoritatively compiled by over 200 internationally respected authorities.

Take the
**ENCYCLOPEDIA
OF COMPUTER
SCIENCE**

—a \$60.00 value—
yours for only

\$2.95

when you join **The Library of Computer and Information Sciences**. You simply agree to buy 3 more books—at handsome discounts—within the next 12 months.

Find the answers to virtually all your data processing questions in the **ENCYCLOPEDIA OF COMPUTER SCIENCE**.

Thousands of photos, diagrams, graphs and charts completely illuminate the **ENCYCLOPEDIA's** clear and thorough coverage of every area of the computer sciences—software, hardware, languages, programs, systems, mathematics, networks, applications, theory, history and terminology.

Appendices provide abbreviations, acronyms, special notations and many numerical tables. An additional highlight is a complete cross-reference system that assists the reader seeking in-depth information.

What is The Library of Computer and Information Sciences?

It's a book club especially designed for the computer professional. In the incredibly fast-moving world of data processing, where up-to-date knowledge is essential, we make it easy for you to keep totally informed on all areas of the information sciences. In addition, books are offered at discounts up to 30% off publishers' prices.

Begin enjoying the club's benefits by accepting the **ENCYCLOPEDIA OF COMPUTER SCIENCE**. It's the perfect reference for computer professionals... and it's a great bargain, too.

4 Good Reasons to Join

- 1. The Finest Books.** Of the hundreds and hundreds of books submitted to us each year, only the very finest are selected and offered. Moreover, our books are always of equal quality to publishers' editions, *never* economy editions.
- 2. Big Savings.** In addition to getting the **ENCYCLOPEDIA OF COMPUTER SCIENCE** for \$2.95 when you join, you keep saving substantially—up to 30% and occasionally even more. (For example, your total savings as a trial member—including this introductory offer—can easily be over 50%. That's like getting every other book free!)
- 3. Bonus Books.** Also, you will immediately become eligible to participate in our Bonus Book Plan, with savings of at least 70% off the publishers' prices.
- 4. Convenient Service.** At 3–4 week intervals (16 times per year) you will receive the Book Club News, describing the Main Selection and Alternate Selections, together with a dated reply card. If you want the Main Selection, do nothing and it will be sent to you automatically. If you prefer another selection, or no book at all, simply indicate your choice on the card, and return it by the date specified. You will have at least 10 days to decide. If, because of late mail delivery of the News, you should receive a book you do not want, we guarantee return postage.

The Library of Computer and Information Sciences

7-AM3

Riverside, N.J. 08075

Please accept my application for trial membership and send me the **ENCYCLOPEDIA OF COMPUTER SCIENCE** (44900-3) billing me only \$2.95. I agree to purchase at least three additional Selections or Alternates over the next 12 months. Savings range up to 30% and occasionally even more. My membership is cancelable any time after I buy these three books. A shipping and handling charge is added to all shipments.

No-Risk Guarantee: If you are not satisfied—for any reason—you may return the **Encyclopedia of Computer Science** within 10 days and your membership will be canceled and you will owe nothing.

Is your child college-bound?

This complete home-study course shows how to master the Scholastic Aptitude Test.

The Scholastic Aptitude Test is the most important exam of anyone's life. Unfortunately, high schools don't bother to teach students how to prepare for the SAT.

Now there's a solution: The complete SAT Home-Study Course. It can help improve the test scores of any college bound student.

This remarkable course consists of the new 372-page book, **How to Take the SAT**, and accompanying audio cassettes that carefully guide the listener through the text. The course was created by Marcia Lawrence, whose instruction has helped thousands of high school students maximize their SAT scores and win acceptance by the college of their choice.

Unlike other SAT books, this unusual course is not simply a collection of sample tests. Instead, it's a crash course in the *techniques* of test-taking. It helps the student *get inside the heads of the test-makers*. Because he learns how the questions are constructed, he has a better chance of determining the correct answers.

"Every answer is built right into the test," says Ms. Lawrence. "My course shows the student how to dig it out."

Step by step, Marcia Lawrence leads the listener through a series of typical SAT questions. She shows how to spot key clues, how to eliminate wrong choices, and how to zero in on the right answer—time after time.

TO ORDER, JUST CLIP THIS AD and mail it with your name and address, and a check or money order for \$21.95 plus \$1.00 for handling & postage. Or charge to your credit card (American Express, Master Charge or Visa) by enclosing your card number, expiration date, and signature. (New York State residents add applicable tax.)

You're fully protected by Audio-Forum's unconditional money-back guarantee: If you're dissatisfied with the course for any reason, return it within three weeks for a prompt and full refund.

THE PSYCHOLOGY OF FREEDOM

Liberty and Love as a Way of Life

by Peter R. Breggin, M.D. • published by Prometheus Books

Discount distribution by Lake House Books • P.O. Box 5919, Washington, D.C. 20014

The role of free will, reason, personal freedom, and love in everyday life. The origins of guilt, shame and anxiety. How and why individuals become paranoid or depressed. How to resolve conflicts between personal freedom and binding romantic love. The difference between need and love. How to raise children without the use of force or emotional bullying. Self-oppression — the process through which we sacrifice our individual values and ourselves. Self-determination — the process through which we take control of our minds, bodies and lives.

Human failure and human success are made understandable in terms of the decision-making individual who can ultimately take responsibility for his or her own life. Both an original theoretical work and a practical guide to self-determination, this is a "free person's psychology" that can put you in closer touch with yourself, your loved ones and your values.

"Breggin's contribution is so enormous, this book is "must reading" for all those who wish to be more than technicians in psychiatry." Robert Seidenberg, M.D., Psychoanalyst and Clinical Professor of Psychiatry, State University of N.Y., Syracuse.

"Valuable for anyone who is involved in life. Truly a magnificent creation. Simple, yet brilliant." Dallas Cooley, M.D., President, Libertarian Health Association, Fairfax, Virginia.

"This is a lovely book. It speaks to a yearning for self-determination and individual happiness that is the mainspring of today's three great grassroots movements — libertarianism, feminism and the human potential movement." Joan Kennedy Taylor, Senior Editor, *Libertarian Review*, and co-author, *When to See a Psychologist*, San Francisco.

"His rules for human relationships based on individual freedom and the expression of love deserve our serious attention if we are ever to break the destructive chains of violence that keep us from making sane choices for our personal and collective survival." Harvey Fireside, Ph.D., Professor of Political Science, Ithaca College, and author, *Soviet Psychoprisons*.

Psychiatrist and author Peter R. Breggin, M.D. has led the international campaign against oppressive psychiatric technology. His recent book, *Electroshock: Its Brain-Disabling Effects*, is the definitive scientific and ethical analysis of how technological treatments worsen human problems. Formerly a Teaching Fellow at Harvard Medical School and fulltime Consultant with NIMH, he is currently in private practice in the Washington, D.C. area. He now presents his carefully reasoned alternative to oppressive, authoritarian psychiatry — the psychology of self-determination.

"This book provides the means to help you understand the complicated processes of your mind, including the principles by which to determine the course of your life." Henry J. Norris, M.D., Chairman, Department of Gynecologic and Breast Pathology, Armed Forces Institute of Pathology, Washington, D.C.

"You look and look for a book that you can suggest that will help both patients and students understand themselves. This book is it." Richard Phillips, M.D., Associate Professor of Psychiatry, State University of N.Y., Syracuse.
