BOOKS

BOOKS is an editorial service for readers' information. To order any book listed or any U.S. book in print please remit retail price, plus 50¢ handling charge for each book to **Book Order Service**, Science News, 1719 N Street, N.W., Washington, D. C. 20036. All books sent postpaid. Domestic orders only.

ARE WE ALONE?: The Possibility of Extraterrestrial Civilizations — Robert T. Rood and James S. Trefil. Discusses those aspects of scientific knowledge that bear on the question of extraterrestrial intelligence, points out what knowledge is firm, which areas are "shaky" and which areas would benefit from more research effort. Each of the authors — one a physicist, the other an astronomer — presents his conclusions on the possibility of extraterrestrial civilizations. Scribner, 1981, 262 p., illus., \$14.95.

COSMIC DISCOVERY: The Search, Scope, and Heritage of Astronomy — Martin Harwit. Shows how recent revolutionary astronomical discoveries came about and what these discoveries mean for the future of cosmic exploration. Basic, 1981, 334 p., illus., \$25.

THE DAMOCLES SYNDROME: Psychosocial Consequences of Surviving Childhood Cancer — Gerald P. Koocher and John E. O'Malley. Contains a wealth of information on the psychosocial adjustment of the largest group of survivors of childhood cancer investigated in a systematic way. The authors offer thoughtful recommendations about modes of care for such children from the time of diagnosis through treatment to continuing follow-up. McGraw, 1981, 218 p., charts, \$17.95.

THE FIRST STARGAZERS: An Introduction to the Origins of Astronomy — James Cornell.

*A guide to greater
energy self-sufficiency*

HOW TO BE YOUR OWN POWER COMPANY

By Jim Cullen

An innovative new manual that tells you everything you need to know to design and install a low voltage DC system in your home that is economical, safe, and highly effective. Jim Cullen provides you with a common sense alternative to expensive, medium-voltage AC power that draws on irreplaceable fossil fuels. His 12 volt DC system can operate either independently of public utility power or as a supplement to standard utility installations. 142 pp., 8½ x 11, 113 illus., \$16.95 cloth

This is a book about discovery: how ancient man discovered the sky, how archaeoastronomers, in turn, are discovering the unwritten record of the early scientific achievements and, finally, how this record may help all of us discover something about ourselves. Scribner, 1981, 262 p., illus., \$15.95.

A GUIDE TO BIRD FINDING WEST OF THE MISSISSIPPI — Olin Sewall Pettingill, Jr. For each of the western states this distinguished ornithologist locates the characteristic bird species, including wintering populations, and describes the bird-finding sites in each state — national and state parks and forests, wildlife refuges, city parks, etc. Oxford U Pr, 2nd ed., 1981, 783 p., illus. by George Miksch Sutton, \$25.

HOME WIND POWER — U.S. Dept. of Energy. Tells how to evaluate whether a wind system is practical for your home. Covers site selection, power and energy requirements, installation, monitoring and maintenance of a wind energy system. Originally published in 1978 as *Wind Power for Farms, Homes and Small Industry*, U.S. Dept. of Energy. Additional wind behavior and site selection information and a wind power catalog have been added to this publication. Garden Way Pub, 1981, 203 p., illus., paper, \$10.95.

INTERNATIONAL MEDICAL WHO'S WHO: A Biographical Guide in Medical Research — Compiled by the editorial staff of Francis Hodgson Reference Publications. A biographical dictionary of more than 12,000 international persons prominent in medical research. Includes listings for heads of relevant university departments, officers of national and international medical associations, and those on editorial boards of major medical journals. Longman Group Ltd(Gale), 1980, 2 vols., 1,301 p., \$235.

LANGUAGE AND SPEECH — George A. Miller. Focuses on the biological side of language and discusses the evolution and development of language and speech in the population and in the individual. W H Freeman, 1981, 150 p., illus., \$13, paper, \$5.95.

A NATURAL HISTORY OF MARINE MAMMALS — Victor B. Scheffer. Tells how the marine mammals evolved from land ancestors and how they met and overcame the challenges of a cold, wet, vast and salty ocean. Describes the peculiar features of anatomy, physiology and behavior that characterize the various species. Originally published in hardback in 1976. Scribner, 1981, 157 p., illus., paper, \$5.95.

THE SUMMER STARGAZER: Astronomy for Beginners — Robert Claiborne. Provides a set of directions whereby the beginner can move through the bewildering elementary stages of observational astronomy. Many of the most interesting celestial objects that can be viewed through a small telescope can be seen in the Northern Hemisphere in the hours before midnight only during the summer. Describes only what the reader can reasonably expect to see with a small telescope. Originally published in hardback in 1975. Penguin, 1981, 222 p., star maps and drawings by Jonathan Field, \$4.95.

THE WILD EDGE: Life and Lore of the Great Atlantic Beaches — Philip Kopper. Describes "a ribbon of a region running from the pug nose of Maine to the sandy underbelly of the Outer Banks." Part horizontal field guide, part anthology of the natural sciences, it surveys the many constituent parts of the beach for the beach stroller and the serious student. Originally published in hardback by Times Books in 1979. Penguin, 1981, 280 p., illus. by Anne E. Lacy, paper, \$6.95.

WHO'S POISONING AMERICA: Corporate Polluters and their Victims in the Chemical Age — Ralph Nader, Ronald Brownstein and John Richard, Eds. Considers seven environmental disasters of the past decade. Examines in each case the toll on citizens and their communities. Ralph Nader in his conclusion explores options for legislative and citizen action. Sierra(Scribner), 1981, 369 p., \$12.95.
