

You can now have...in a single volume...the essential facts from every entry in the 16-volume, \$695.00 *Dictionary of Scientific Biography* ...for only \$66.67

Winner of the 1981 Dartmouth Medal, the multi-volume DSB has received international acclaim. Said *Booklist*: "Exemplifying original scholarship at the highest level, the *Dictionary* can be prudently characterized as monumental."

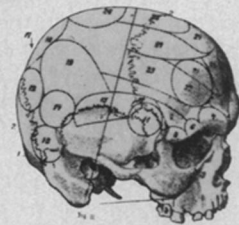

Now, at a fraction of the cost, here is a one-volume abridgement that provides basic information from each of the more than 5,000 biographies in the parent set. Brief, clear, and meticulous in detail, this ready reference on the history of science provides the dates of birth and death, education, thought, and accomplishments of every major scientist from antiquity to the late twentieth century. An alphabetical listing of all scientists by fields of endeavor is also included. 784 pages. \$66.67

PUBLISHED UNDER THE SPONSORSHIP OF THE AMERICAN COUNCIL OF LEARNED SOCIETIES

A pictorial history of science from its origins to the present time...“A valuable and much-needed resource.”—*Isis*

This five-volume reference work, when complete, will have over 2,000 carefully chosen illustrations—many never before readily accessible—offering a pictorial anthology of the development of science, from the stargazers of ancient Babylon to space exploration and genetic engineering. Presented for their own historical value, the illustrations—derived from artifacts, paintings, engravings, woodcuts, drawings, manuscripts, and contemporary photographs—document the past as words alone cannot do. Each is informatively captioned and supporting text provides an overview of science in its physical, cultural, and social environment. Text, captions, and illustrations are fully indexed, and each volume has a bibliography and a complete list of picture sources. Each volume, \$45.00

ALBUM OF SCIENCE

I. Bernard Cohen,
General Editor

Now available...

THE NINETEENTH CENTURY. L. Pearce Williams, Cornell University. "Fascinatingly set forth, with a profusion of extraordinary pictures."—*Library Journal*. Over 500 illustrations. \$45.00
