Diagnosing the Effects of Ultrasound

Brick House

We use our energy so you can save yours.

Passive Solar Energy: The Homeowners Guide to Natural Heating and Cooling by Bruce Anderson and Malcolm Wells. "A simple, mercifully non-technical primer." CoEvolution Quarterly. \$10.95 paper, \$17.95 cloth

Solar Retrofit by Daniel Reif. Add solar to your house with these complete instructions, materials lists and detailed construction drawings for four retrofit systems. Direct Gain. TAP. Attached Solar Greenhouse. Horizontal Air Flow Collector. \$11.95 paper

The Solar Home Book by Bruce Anderson and Michael Riordan. The classic book on the subject. "Must reading." The New York Times. \$14.95 paperback

Superinsulated Houses and Double-Envelope Houses by William Shurcliff. A look at the state-of-the-art of these new constructions which need no central heating systems, even in the coldest climates! "The best book." The New York Times. \$13.95 paperback, \$19.95 cloth

The Homeowner's Energy Investment Handbook by Michael McClintock. How to decide which of the hundreds of energy-saving improvements will really pay off for your house. \$8.95 paperback

Photovoltaics: Sunlight to Electricity in One Step by Paul Maycock and Edward Stirewalt. "(A) remarkable volume . . . readable." Paul MacCready. "Comprehensive introduction." The Boston Globe. "The two authors seem to have combined the best features of a mini-encyclopedia and a hard-to-lay-down novel." CoEvolution Quarterly. \$12.95 paperback

A New Prosperity: The SERI Solar/Conservation Study. Introduction by Denis Hayes. The famous, formerly suppressed report which sets forth an economically feasible energy strategy for a low-cost, high-productivity energy future. "The last word on energy as a political issue." Solar Age. \$19.95 paperback, \$39.95 hardcover.

Least-Cost Energy: Solving the CO₂ Problem by Amory Lovins, L. Hunter Lovins, Florentin Krause and Wilfrid Bach. Solving the problem of the greenhouse effect with an economically feasible energy strategy. "I commend this book to all thoughtful readers." Dr. Stephen A. Schneider. \$17.95 cloth.

From practical books on making your present home . . . or your Dream House . . . more energy-efficient to the latest thinking on energy policy, look to Brick House for the best reference materials.
