

# Learn Spanish the Foreign Service way!

Now you can learn to speak Spanish with the course good enough for the U.S. State Department's Foreign Service Corps—the same one they've created to teach their own overseas personnel.

You can be fluent in Spanish! That's right, *fluent*. You can be speaking Spanish with all the confidence of a seasoned traveller in a matter of weeks. As well-versed in Spanish as if you worked for the Foreign Service Corps—because that's exactly whom you'll be learning from.

The Foreign Service Institute has carefully developed its Programmatic Spanish Course to train its personnel quickly, thoroughly, and effectively. Its clear, easy to follow approach and arrangement of material makes this a perfect method for successful self-instruction.

The FSI's complete program is now available to *you*. We will send you the entire audio cassette series and instruction books to lead you step by step to fluent Spanish in weeks. You work when and where you can, at your own pace, following the taped lessons—which use native speakers exclusively. You progress according to the schedule you establish. It won't be long before you start speaking and thinking in your new language. **This program has to work—our State Department depends on it!**

**MONEY-BACK GUARANTEE**—Both Basic and Intermediate courses are available, and both come with our **MONEY-BACK GUARANTEE**: try the FSI course for three weeks. If you're not completely satisfied, return it for a full refund. **There's no risk and no obligation, so order today!**

# Is your child college-bound?

This complete home-study course shows how to master the Scholastic Aptitude Test.

This remarkable course consists of the new 372-page book, **How to Take the SAT**, and accompanying audio cassettes that carefully guide the listener through the text. The course was created by Marcia Lawrence, whose instruction has helped thousands of high school students maximize their SAT scores and win acceptance by the college of their choice.

Unlike other SAT books, this unusual course is not simply a collection of sample tests. Instead, it's a crash course in the *techniques* of test-taking. It helps the student *get inside the heads of the test-makers*. Because he learns how the questions are constructed, he has a better chance of determining the correct answers.

"Every answer is built right into the test," says Ms. Lawrence. "My course shows the student how to dig it out."

Step by step, Marcia Lawrence leads the listener through a series of typical SAT questions. She shows how to spot key clues, how to eliminate wrong choices, and how to zero in on the right answer—time after time.

**TO ORDER, JUST CLIP THIS AD and mail it with your name and address, and a check or money order for \$23.95 plus \$1.00 for handling & postage.** Or charge to your credit card (American Express, Master Charge or Visa) by enclosing your card number, expiration date, and signature. (New York State residents add applicable tax.)

**You're fully protected by Audio-Forum's unconditional money-back guarantee:** If you're dissatisfied with the course for any reason, return it within three weeks for a prompt and full refund.

The Scholastic Aptitude Test is the most important exam of anyone's life. Unfortunately, high schools don't bother to teach students how to prepare for the SAT.

Now there's a solution: The complete **SAT Home-Study Course**. It can help improve the test scores of *any* college bound student.

# Sample Comparison, Controversy, Conviction

## PERPETUAL MOTION

A subjective history with fascinating illustrations of this quest for the impossible. Explains why the various attempts cited here failed. paper, \$5.95

An ingenious visual guide to the relative

speed, size, strength, area, height, depth, length, quantity, shape, mass, hardness, temperature, noisiness, running, jumping, lifting, swimming, diving, drilling, flying, birth, growth, aging, life expectancy, evolution and more

of man, woman, animals, birds, fish, insects, dinosaurs, cars, trains, planes, rockets, buildings, bridges, tunnels, trees, waterfalls, mountains, rivers, islands, oceans, planets, stars, galaxies and more

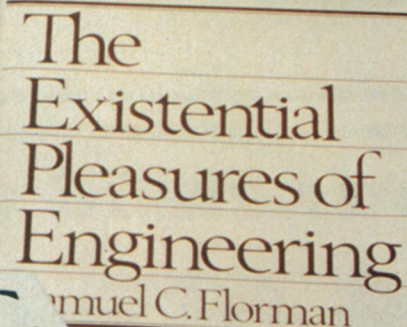

plus comparisons of number, design, and for measurement of heat, energy, probability

An incomparably educational illustration

by the Diagram Group

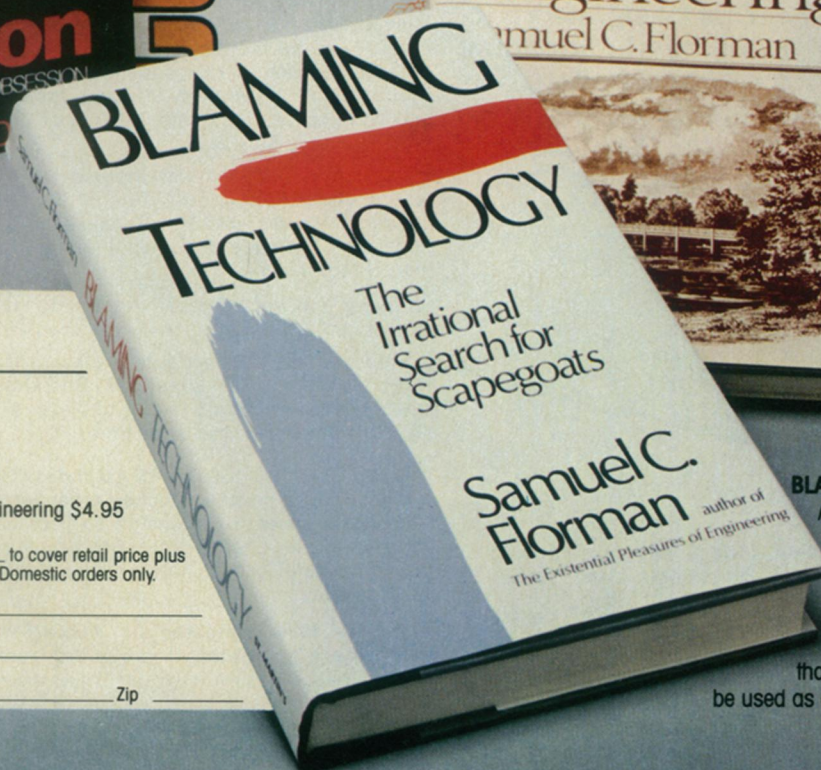

## COMPARISONS

A visual guide to measurement — how man measured in the past and the many systems of measurement used today. Unique drawings, diagrams and charts point up the comparisons. \$15.00

## THE EXISTENTIAL PLEASURES OF ENGINEERING

Draws on history, philosophy, science and literature to demonstrate that engineering is an expression of mankind's most elemental impulses and sublime aspirations. paper, \$4.95

## BLAMING TECHNOLOGY

Addresses the controversial issues concerning technology with common sense and realism and confronts the myths that allow technology to be used as a scapegoat. \$12.95

SCIENCE NEWS BOOK ORDER DEPT  
1719 N St. NW Dept. RB32  
Washington, DC 20036

PLEASE send me the following:

- Comparisons \$15.00
- Perpetual Motion \$5.95
- Blaming Technology \$12.95
- The Existential Pleasures of Engineering \$4.95
