EMBARK ON A SPECTACULAR
INTERGALACTIC JOURNEY FROM OUR
SOLAR SYSTEM TO THE EDGE OF THE UNIVERSE WITH GALAXIES.

This dramatic pictorial treatment of galactic phenomena is truly an "astronomical" treasure.

Timothy Ferris, winner of the 1978 American Institute of Physics Prize for THE RED LIMIT and co-author with Carl Sagan of MURMURS OF EARTH, has created yet another masterpiece in popular astronomy.

GALAXIES—measuring 13" x 14"—combines an outstanding portfolio of the best photographs to date with a vivid text which details each galaxy and surveys the most recent findings and speculations. From the Milky Way to the Andromeda Galaxy to the Virgo and Coma Clusters—GALAXIES is a celebration of galaxies in all their evocative beauty.

The 39 color and 106 black-and-white photographs each possess a deep, luminous quality, perfectly suiting its subject. GALAXIES also features 20 line drawings by noted illustrator Sarah Landry and a huge 13" x 56" gatefold photographic mosaic of the Milky Way. An extensive bibliography, glossary and index are also included.
