

Why THE AUDUBON SOCIETY ENCYCLOPEDIA is hailed as "The bird-lover's bible!"*

IT'S HUGE, unprecedented, gloriously illustrated—the first one-volume encyclopedia to provide full, concise, impeccable information on *all* the birds that nest or have been sighted in North America.

Naturalists acclaim it

ROGER TORY PETERSON says, "I intend to keep my copy near my desk, for frequent use. It is a much-needed, broad-ranging accomplishment, and a most felicitous layman's reference."

DEAN AMADON, Lamont Curator Emeritus of Birds, American Museum of Natural History: "A massive achievement...I consider it to be one of the outstanding ornithological publications of this or any other time." —From his Foreword

Reviewers extol it

"I fell in love with it!" says *Newsweek's* critic Walter Clemons. "A monumental work that happens to be irresistibly readable."

"The most impressive American bird book since John J. Audubon's *Birds of America*," says the Associated Press... "A must for serious bird students" (*Chicago Tribune*).

*"Destined to retain its primacy for years to come," says John Barkham, calling it "the bird-lover's bible!"

About the author

JOHN K. TERRES, who for 13 years edited *Audubon* magazine and in 1971 received the John Burroughs Medal for distinguished nature writing, has devoted over two decades to the preparation of this book.

"Awesome," writes Edmund Fuller in the *Wall Street Journal*, "is the only word for the author's knowledge of his field...A magnificent project...the extraordinary capstone of a career."

9 x 11 • With 1,675 illustrations in color and black-and-white
1,135 pages • \$60 at all bookstores
Special discounted price for Science News readers: \$49.95

The Body Machine

CHRISTIAAN BARNARD Consulting Editor

A completely current report of everything science knows about the body, from why we need sleep to what kinds of research doctors are doing on the control of chronic pain, from what makes hair turn gray to how human fertility may be significantly improved in the years to come.

Prepared by a team of medical experts under the editorial direction of Dr. Christiaan Barnard, the renowned surgeon who performed the first human-to-human heart transplant, the Body Machine offers a clear, direct look at the human body, exploring the way it grows, develops, and regulates itself, and what conditions help maintain it at peak performance.

Profusely illustrated, 256 pages.

Contents

Introduction

Body Systems

Cell
Reproductive system
Chassis
Nervous system
Endocrine system
Heart
Blood
Lymphatic system
