

September, 1983. Travel to a planet you know almost nothing about.

Earth.

The entire September issue of SCIENTIFIC AMERICAN is devoted to a single topic—The Dynamic Earth. Here, for the first time in one publication, the scientists who made the continental-drift revolution in geology present the new, unified picture of our planet.

What makes the Earth so interesting—and our presence on it possible—is that this planet is dynamic.

The recognition of continental drift two decades ago (See “Continental Drift” by J. Tuzo Wilson in the April 1963 SCIENTIFIC AMERICAN) brought on a revolution in geology that has given us a coherent view of our planet.

In the new picture, the ocean floor shares prominence with the dry land of the continents. Immense forces originating underneath the crust are seen to play as large a role in changing the world map as the more visible cycles of the hydrosphere, the atmosphere and the biosphere. Interlocking with these cycles, the crust turns over in a cycle that regenerates the eroding continents from the seafloor rock.

New crustal rock continues to be generated by the upwelling of the mantle under the midocean ridge that girdles the Earth. Spreading outward from the ridge, the new ocean floor pushes the continental rafts this way and that.

Travel with us to planet Earth by starting your subscription with our September single-topic issue. Each month, you will enjoy first-hand reports on new work in all the sciences, written by the scientists who do the work and make the discoveries. In close collaboration with our editors they provide you, the interested layman, with clear explanation of the latest advances.

At the centerfold of the September issue, see the 20-page catalogue of books on computers, software, programs, languages and games.

This free book with your subscription.

Yes, enter my subscription to the monthly issues of SCIENTIFIC AMERICAN for the term checked—at a considerable saving on the \$2.50 newsstand price. When my payment is received, you will also send me *The Planets* as my bonus book. If not satisfied I may cancel at any time and receive a refund on the unused balance. The bonus book is mine to keep.

SCIENTIFIC AMERICAN

The Body Machine

CHRISTIAAN BARNARD Consulting Editor

A completely current report of everything science knows about the body, from why we need sleep to what kinds of research doctors are doing on the control of chronic pain, from what makes hair turn gray to how human fertility may be significantly improved in the years to come.

Prepared by a team of medical experts under the editorial direction of Dr. Christiaan Barnard, the renowned surgeon who performed the first human-to-human heart transplant, the Body Machine offers a clear, direct look at the human body, exploring the way it grows, develops, and regulates itself, and what conditions help maintain it at peak performance. Profusely illustrated, 256 pages.

Contents

Introduction

Body Systems

Cell
Reproductive system
Chassis
Nervous system
Endocrine system
Heart
Blood
Lymphatic system
Immune system
Respiratory system
Digestive system
Liver
Renal system

On The Road

Prenatal development
Infancy
Adolescence
Adulthood

The Ghost In The Machine

Stress

Mental abnormality

Mind medicines

Body Maintenance

Lifestyles
Diet
Sleep
Drugs
Smoking
Alcoholism
Tropical diseases
Birth control: how and why
Check-ups
World public health
Urogenital problems
Dealing with a heart attack
The con brigade

In The Workshop

The future course of medicine
New parts for old
Genetic engineering
The search for immortality
