

Journey to the edge of scientific understanding with ...

GREAT SCIENCE WRITERS

including—

- Isaac Asimov
- P.C.W. Davies
- John McPhee
- John Gribbin
- and ■ David Attenborough

5 volumes for only **\$295**

when you join the **Natural Science Book Club**. You simply agree to buy 3 more books—at handsome discounts—within the next 12 months. The Natural Science Book Club is a unique club devoted to bringing you exciting, refreshingly different books by such bestselling science authors as **Carl Sagan**, **Stephen Jay Gould**, and **Nigel Calder**. From the life story of early man to the death of the solar system... all wonders of the natural world are revealed to members of the Natural Science Book Club.

A MEASURE OF THE UNIVERSE. Isaac Asimov. Science's most prolific and popular writer leads us to an enhanced understanding of the linear measure of the Universe from the minute to the seemingly infinite, and follows suit with area, volume, density, pressure, time, speed, and temperature. Illustrated throughout by Roger Jones. **Publisher's Price: \$15.95 (Hardcover).**

THE FORCES OF NATURE. P.C.W. Davies. Acclaimed author of *Space and Time in the Modern Universe* explores the fascinating world within the atom, including early theories of the atom in 5th century B.C. Greece to the latest spectacular discoveries in subatomic physics. 73 diagrams. **Publisher's Price: \$29.50 (Hardcover).**

IN SUSPECT TERRAIN. John McPhee. For brilliant reportage of complex scientific material John McPhee, author of *The Curve of Binding Energy* and *The Pine Barrens*, has no equal. *In Suspect Terrain* continues to reflect that excellence in a series of fast-paced geological investigations into the controversial evolution of the Appalachian mountain chain. **Publisher's Price: \$11.50 (Hardcover).**

FUTURE WEATHER AND THE GREENHOUSE EFFECT. John Gribbin. In this provocative new book, the author of *Timewarps* and *Genesis* warns of the "greenhouse effect"—the man-made build-up of carbon dioxide in our biosphere—and the devastating climatic effects to be expected if left unchecked. **Publisher's Price: \$14.95 (Hardcover).**

LIFE ON EARTH. David Attenborough. In this lavishly illustrated companion to the PBS television series, David Attenborough traces the entire history of life on our planet—from the emergence of one-celled organisms 300 million years ago to apelike, but upright man. "Simply stupendous."—Konrad Lorenz. "Outstanding."—*N.Y. Times Book Review*. 134 pages of full-color photos. **Publisher's Price: \$11.95 (Softcover).**

MEMBERSHIP BENEFITS • In addition to getting Great Science Writers (00556) for only \$295 when you join, you keep saving substantially on the books you buy. • Also, you will immediately become eligible to participate in our Bonus Book Plan, with savings up to 70% off the publishers' prices. • At 3–4 week intervals (16 times per year) you will receive the Book Club News, describing the Main Selection and Alternate Selections, together with a dored reply card. • If you prefer another selection, or no book at all, simply indicate your choice on the card, and return it by the date specified. • You will have at least 10 days to decide. • If, because of late mail delivery of the News, you should receive a book you do not want, we guarantee return postage.

Natural Science Book Club

4-AX2

Riverside, New Jersey 08075

Please accept my application for trial membership and send me Great Science Writers (00556), billing me only \$295. I agree to purchase at least three additional Selections or Alternates over the next 12 months. Savings range up to 30% and occasionally even more. My membership is cancelable any time after I buy these three books. A shipping and handling charge is added to all shipments.

No-Risk Guarantee: If you are not satisfied—for any reason—you may return Great Science Writers within 10 days and your membership will be canceled and you will owe nothing.
