

# An Eloquent Response to Antitechnologists:

Until now, few have dared to buck the fashionable trend and take on Charles Reich, Lewis Mumford, Theodore Roszak and others who have denounced the philosophy and consequences of technology and engineering.

## An Engineer Fights Back

THE EXISTENTIAL PLEASURES OF ENGINEERING, written by Samuel C. Florman, is an eloquent answer to the naysayers and Cassandras, to those who believe that technology is inherently evil, to those who see engineers as insensitive materialists.

A professional engineer and author of a number of books and articles concerning the relationship of engineering to the general culture, Samuel C. Florman draws on history, philosophy, science and literature to demonstrate that en-

gineering is an expression of mankind's most elemental impulses and sublime aspirations.

## A Powerful, Persuasive Argument

While acknowledging that our society's faith in material progress has been shattered, Florman demolishes the notion that technology is destructive, the root of all evil. He refutes the stereotype of engineer as automaton, hostile to humanistic values. And he does so with consummate wit and elegance.

Essential reading for all those concerned with our culture and its vital relationship to science and technology, THE EXISTENTIAL PLEASURES OF ENGINEERING is a delightful and important work, now available through the Science Service Book Order Department.

# OX BOW PRESS announces

**LUDWIG BOLTZMANN** is the life story of the man whose work led directly to Planck's development of radiation quantum and Einstein's theory of Brownian motion, and was one of the great physicists of all time. This is the drama of the great Austrian scientist's life, his scientific achievements, and his controversial philosophical writings.

176 pages, photographs

ISBN: 0-918024-24-2  
**Hardcover \$22.50**

**THE MIRACLE OF EXISTENCE** is a work of philosophy that boldly approaches the great issues: the mind-body problem, consciousness, the nature of thought, science and religion, and the universal mind. Margenau draws together an understanding of science, philosophy, and religion in order to create a coherent whole, a metaphysics for the atomic age.

ISBN: 0-918024-26-9  
**Hardcover \$16.**

## MY VIEW OF THE WORLD

**Erwin Schrödinger**

Schrödinger, developer of the wave theory of quantum mechanics, was the first physicist to turn to the sacred writings of the East for philosophical insights. This book relates the new physics to the Vedantic vision.

## OPEN VISTAS

**Henry Margenau**

Margenau takes his detailed views of philosophy of physics and recasts them in a popular statement, extending his vision to broader areas of human affairs, esthetics, and the decay of materialism.

256 + x pages  
 ISBN: 0-918024-27-7  
**Hardcover \$26.**

ISBN: 0-918024-28-5  
**Sewn Paperback \$14.**

## SYMMETRIES AND REFLECTIONS

**Eugene Wigner**

Perceptive essays covering a broad range including the role of symmetry in physics, nuclear energy, epistemology, and contemporary history of physics.

280 + viii pages

ISBN: 0-918024-16-1  
**Sewn Paperback \$10.**

## THE LOGIC OF THE SCIENCES AND THE HUMANITIES

**F.S.C. Northrop**

A philosophy of science in its broadest terms, the author starts with the natural history stage of inquiry, and moves to deductively formulated theories and problems of epistemology.

402 + xiv pages

ISBN: 0-918024-31-5  
**Sewn Paperback \$17.**

## WHERE IS SCIENCE GOING?

**Max Planck**

A popular discussion of the nature and future of the sciences written by the man who set physics on its current course.

224 pages  
 ISBN: 0-918024-21-8

THE ENCYCLOPEDIA OF NATURAL INSECT AND DISEASE CONTROL includes the latest biological controls, contains more than 100 color photos and nearly 200 line drawings for identification. For ease of reference, the book is one big A-to-Z guide, with entries for more than 150 vegetables, fruits, berries, ornamentals, and trees.

Handy charts and tables help the reader select the appropriate control and show how to plant early or late to miss the bugs, choose a resistant variety, and interplant repellent plants to protect the garden.
