July 14, 1984  
Vol. 126, No. 2  
Pages 17-32

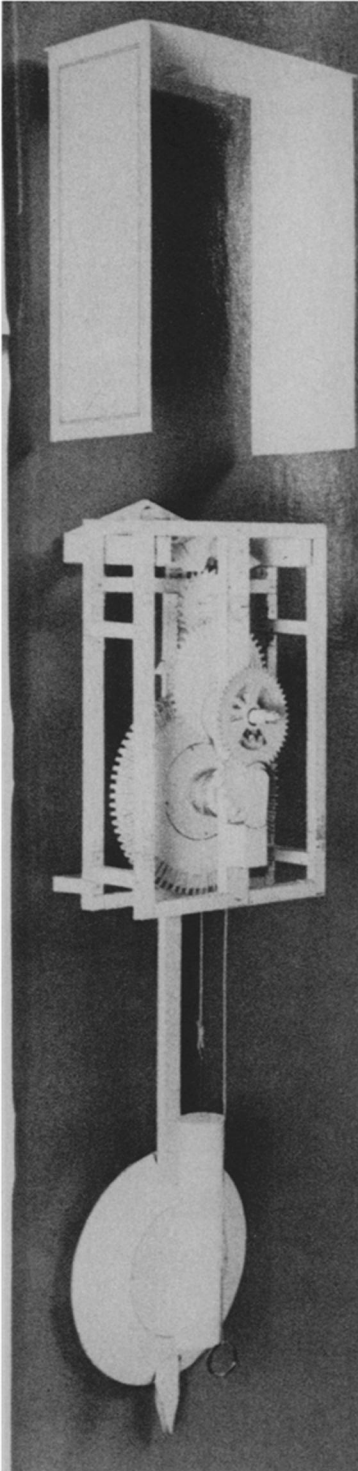

**Beams for Defense**

“Imagine the excitement, then, of being able to build your own, a real clock, that will keep time to the second—and of being able to build one largely out of *paper*—of being able to build it, in fact, out of the substance of this very book. James Smith Rudolph gives you virtually all the material you need, all the directions and instructions, and it is now up to you, working very carefully and slowly, to build yourself a timepiece that Galileo would have given his eyeteeth to own.”

—Isaac Asimov

Harper & Row, 1983, 40 pages,  
9¼ x 12½, paperback, \$7.95

# MAKE YOUR OWN WORKING PAPER CLOCK

Cut this book into 160 pieces, glue them together, and have your own paper clock that actually works

- A precision-engineered timepiece
- It actually works
- It keeps perfect time
- It can be rewound
- It can be regulated
- Operated by weights
- Educational and easy to make
- All you need is scissors and glue
- Complete clock contained in this book
- A unique, working conversation piece
- Fun for the entire family
- Amaze your friends

**JAMES SMITH RUDOLPH**
