HACKERS:

HEROES OF THE COMPUTER REVOLUTION

By Steven Levy

"Hackers: the undisputed masters of code who more than anyone else are responsible for making computers widely available, splendidly useful and fun.... The Hacker Ethic was an idealistic and obsessive standard that led to weird lifestyles, to hilarious clashes with bureaucracies and even to potential illegalities..."

—from **Hackers**

"What Tom Wolfe did for the original astronauts, Steven Levy has done for the founding fathers of the personal computer age: he has made them, and the very special world they inhabit, not only—for the first time—accessible, but irresistibly interesting.

—Joe McGinniss, author of Fatal Vision

"A really intriguing story. Levy has managed to convey the true hacker personality—by showing how their more than normal energy leads them to mildly deviant, though rarely destructive, behavior."

—Stephen Wozniak, designer of the APPLE computer

Doubleday, 1984, 458 pages, 8½" × 5½", hardcover, $17.95

TAKE THE 3-VOLUME
HANDBOOK OF ARTIFICIAL INTELLIGENCE
(A $141.95 VALUE) FOR ONLY $4.95

when you join the Library of Computer and Information Sciences.

You simply agree to buy 3 more books—at handsome discounts—within the next 12 months.

Conceived and produced by leading scientists and researchers at Stanford University, the *Handbook* makes available to scientists, engineers, students, and hobbyists who are encountering AI for the first time the techniques and concepts in this rapidly expanding computer universe.

The 200 articles cover the emerging issues, technical problems, and design strategies which have been developed during the past 25 years of research. The *Handbook* has been written for people with no background in AI; jargon has been eliminated; and, the hierarchical organization of the book allows the reader to delve deeply into a particular subject or browse the articles which serve as overviews of the various subfields.

The 15 chapters (5 per volume) include: the history, goals, and current areas of research activity; the key concept of "search"; research on "natural languages"; the design of programs that understand spoken language; applications-oriented AI research in science, medicine, and education; automatic programming; models of cognition; automatic deduction; vision and learning research; and, planning and problem solving.

The Library of Computer and Information Sciences is the oldest and largest book club especially designed for the computer professional. In the incredibly fast-moving world of data processing, where up-to-date knowledge is essential, we make it easy for you to keep totally informed on all areas of the information sciences.

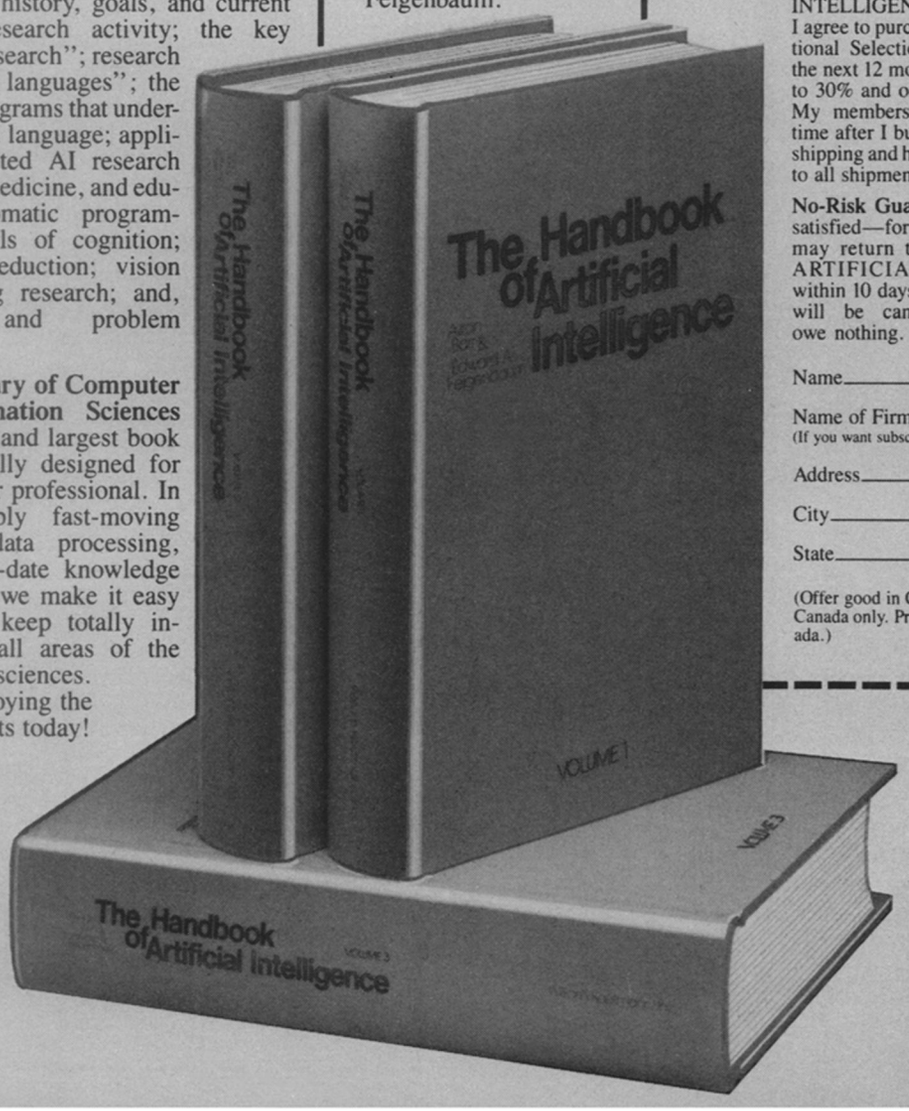
Begin enjoying the club's benefits today!

The comprehensive HANDBOOK OF ARTIFICIAL INTELLIGENCE answers questions like:

- What is a "heuristic problem-solving program?"
- How do computers understand English?
- Can computer programs outperform human experts?

AND INCLUDES:

- Over 1,450 pages.
- More than 200 articles in 15 chapters.
- With numerous charts, tables, and schematics.
- Edited by Avron Barr, Paul Cohen and Edward Feigenbaum.



MEMBERSHIP BENEFITS: In addition to getting the 3-volume HANDBOOK OF ARTIFICIAL INTELLIGENCE for only $4.95, when you join, you keep saving substantially on the books you buy. Also, you will immediately become eligible to participate in our Bonus Book Plan, with savings of up to 70% off the publishers' prices. At 3–4 week intervals (16 times per year) you will receive the Book Club News, describing the coming Main Selection and Alternate Selections, together with a dated reply card. If you want the Main Selection, do nothing and it will be sent to you automatically. If you prefer another selection, or no book at all, simply indicate your choice on the card, and return it by the date specified. You will have at least 10 days to decide. If, because of late mail delivery of the News, you should receive a book you do not want, we guarantee return postage.

The Library of Computer and Information Sciences 7-CF3
Riverside, New Jersey 08075

Please accept my application for trial membership and send me the HANDBOOK OF ARTIFICIAL INTELLIGENCE (00614) for $4.95. I agree to purchase at least three additional Selections or Alternates over the next 12 months. Savings range up to 30% and occasionally even more. My membership is cancelable any time after I buy these three books. A shipping and handling charge is added to all shipments.

No-Risk Guarantee: If you are not satisfied—for any reason—you may return the HANDBOOK OF ARTIFICIAL INTELLIGENCE within 10 days and your membership will be canceled and you will owe nothing.
