Battling the Citrus Canker

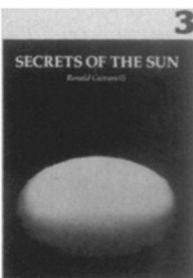

Cambridge World of Science

1 OUR GREEN AND LIVING WORLD *The Wisdom to Save It*

EDWARD S. AYENSU, et al.

A remarkable exploration of the plant habitats of the world: its deserts, grasslands, rain forests, oceans and more, written with a concern for global conservation. With forewords by S. Dillon Ripley and H.R.H. The Prince Philip and an epilogue by the late Indira Gandhi. Copublished with the Smithsonian Institution. Nearly 300 illustrations. **\$24.95**

3 SECRETS OF THE SUN

The late RONALD GIOVANELLI

This authoritative book describes all the main activities that occur on or in the sun and includes the finest and most original photographs of the sun ever collected in a general interest book. 63 photographs **\$19.95**

CREATIVE COMPUTER GRAPHICS

ANNABEL JANDEL and ROCKY MORTON

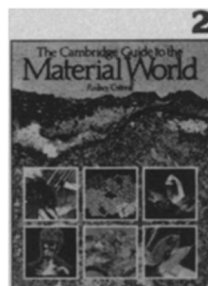

See and learn about computer graphics and how they are used in art, science, feature film, commercials, video games and flight. Simple programs are also included for making images on relatively inexpensive home computers. 150 color and 50 black and white illustrations **\$29.95**

THE MACHINE AT THE BEDSIDE

Strategies for Using Technology in Patient Care

STANLEY J. REISER and
MICHAEL ANBAR, Editors

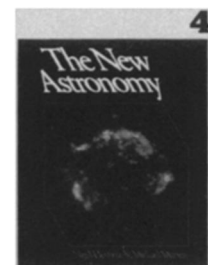

The first book to examine comprehensively the concepts and strategies for using health care technology with effectiveness and humanity. "A most important book on some central issues facing medicine during the coming decades."—David E. Rogers, M.D., President, The Robert Wood Johnson Foundation
cloth \$49.50 paper \$14.95

2 THE CAMBRIDGE GUIDE TO THE MATERIAL WORLD

RODNEY COTTERILL

Experience the fascination, beauty and mystery of the material world in this full-color guide to all materials, both physical and biological, written for the person who wants a concise but comprehensive treatment. 190 photographs **\$34.50**

4 THE NEW ASTRONOMY

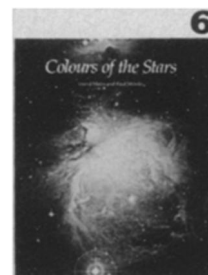

NIGEL HENBEST and MICHAEL MARTEN

A new vision of the night sky emerging from radio astronomy, from X-ray observatories, and from observations working at infrared and ultraviolet wavelengths.

"Two great talents have combined forces to produce a truly fascinating science book."
—*United Press International*

"...contains some of the best color photographs of the heavens I have ever seen..."
—*Forbes*

170 color and 80 black and white illustrations **\$24.95**

6 COLOURS OF THE STARS

DAVID MALIN and PAUL MURDIN

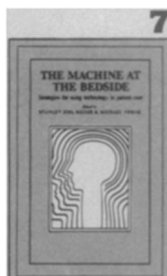

A stunning collaboration between an astronomer renowned for his lucid writing and the world's premier astronomical photographer reveals for the first time the full colors of the stars and their scientific meaning. 50 color and 80 black and white photographs **\$27.95**

8 SPACELAB *Science in Earth Orbit*

DAVID SHAPLAND and MICHAEL RYCROFT

Two participants tell the story of Spacelab, its development, goals, experiments and crew. They answer such questions as how the crew is selected and what life is like on a space station. James M. Beggs, Chief Administrator of NASA, has written the foreword. **\$22.50**
