

"I suspect that this book will be the *Silent Spring* of the counter-revolution. It is a book that cancer researchers, toxicologists, government regulators, environmentalists and concerned laymen will discuss and argue about for years." — *Dr. Bruce N. Ames, Professor and Chairman, Department of Biochemistry, University of California, Berkeley, in Science '84.*

"Ms. Efron's documentation is sound and irrefutable....[and] also includes what is probably the most complete listing of known human carcinogenic agents ever assembled. Only with this knowledge can we understand the problems facing regulators: how the information can be interpreted in different ways and how it can be misused as well as politicized." — *Dr. Stephen S. Sternberg of Memorial Sloan-Kettering Cancer Center, in the Wall Street Journal.*

"Efron's book is readable and credible and expresses valid concerns. It should be read by everyone." — *Dr. Tom S. Miya, Dean of the School of Pharmacy, University of North Carolina, in The American Industrial Health Council Letter.*
