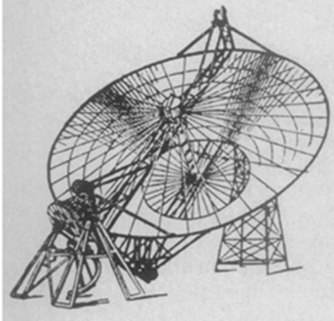
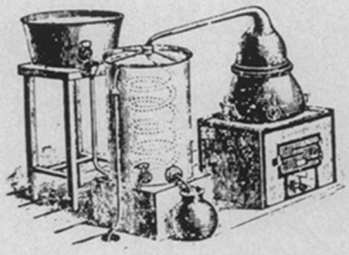
# Look it Up in the Facts-on-File Dictionary of...



**... Astronomy,** edited by Valerie Illingworth. This unique dictionary contains descriptions of the different types of celestial bodies, the instruments used to investigate them and the concepts underlying these studies. Many entries are illustrated and tables are included.
**377 pages, 8½" x 5½", hardcover, $17.50**

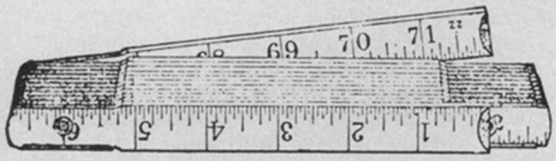
**... Biology,** edited by Elizabeth Tootill. 3,100 commonly used terms in biological science — taxonomic groups, organs, research techniques and more. Useful for nurses, veterinarians, and researchers. Illustrations and tables accompany the text.
**282 pages, 8½" x 5½", hardcover, $16.95**

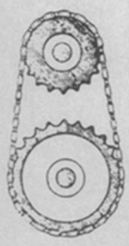
**... Botany,** edited by Elizabeth Tootill and Stephen Blackmore. Important terms from the applied and basic aspects of plant science and selected terms from the fields of agricultural botany, horticulture and microbiology. Line drawings and charts accompany the text.
**391 pages, 8½" x 5½", hardcover, $21.95**



**... Chemistry,** edited by Dr. John Daintith. 2,220 entries, which explain, clearly and concisely, the most important and commonly used chemical terms. Forty-five line drawings that illustrate many complex chemical structures, and tables of physical constants, the characteristics of elementary particles and more.
**233 pages, 8½" x 5½", hardcover, $16.95**

**... Mathematics,** edited by Carol Gibson. 1,200 entries that cover a wide variety of mathematical terms will prove useful for accountants, computer specialists, actuaries and anyone else who uses mathematics. Illustrated with over 65 line drawings and extensively cross-referenced.
**216 pages, 8½" x 5½", hardcover, $16.95**





**... Physics,** edited by Dr. John Daintith and Eric Deeson. 2,000 entries explain the most important and commonly used terms relating to physics. Useful for engineers, computer specialists and students. 50 line drawings help to illustrate many complex physical concepts.
**217 pages, 8½" x 5½", hardcover, $16.95**

**Science News Book Order Service, 1719 N St., NW, Washington, DC 20036**

Enclosed is a check totaling _____ to cover retail price *plus $1.00 per book* to cover handling charges. Make checks payable to **Science News Book Order Service.** Domestic orders only.

*Please send me the following:*

____ Dictionary of Astronomy $17.50
____ Dictionary of Biology $16.95
____ Dictionary of Botany $21.95
____ Dictionary of Chemistry $16.95
____ Dictionary of Mathematics $16.95
____ Dictionary of Physics $16.95

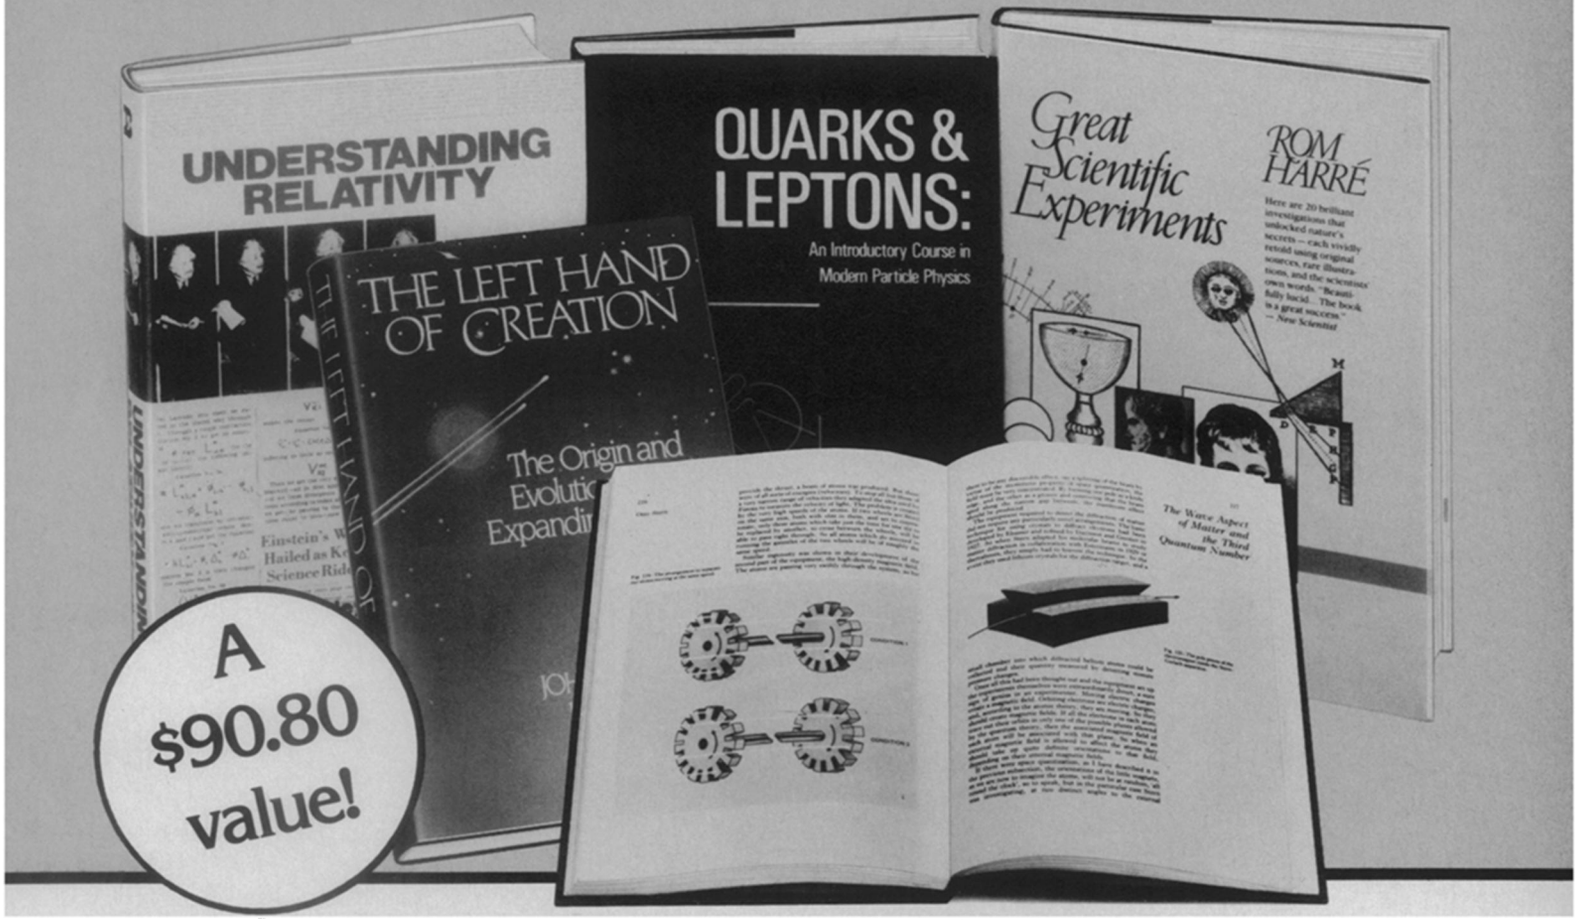
# Take the 4-volume PHYSICS LIBRARY for only $3.95

You simply agree to buy 3 more books—at handsome discounts—in the next 12 months.



Expect the unexpected with the Physics Library —a 4-volume set detailing major breakthroughs in our understanding of the universe on a macro and micro scale.

**1)** In **UNDERSTANDING RELATIVITY,** author Stanley Goldberg goes beyond one of the best non-technical explanations of Einstein's theory and its impact on the scientific community to offer a rare glimpse into the many-sided soul of scientific endeavor. Publisher's Price: $24.95.

**2) GREAT SCIENTIFIC EXPERIMENTS,** by Rom Harré, recounts in vivid detail 20 of the world's most brilliant scientific discoveries from Aristotle's embryos and Galileo's falling bodies to Newton's color spectrum. Experiments illustrate:

- aspects of methodology
- the development of a theory
- techniques and instruments

Publisher's Price: $17.95.

**3)** In **THE LEFT HAND OF CREATION** (The Origin and Evolution of the Expanding Universe), internationally renowned astronomers John D. Barrow and Joseph Silk delve into the latest scenario for the opening moments of the universe—the Big Bang. How unique is the universe? THE LEFT HAND OF CREATION considers which aspects of the universe's structure are inevitable and which arise as just one of the many equally likely possibilities. Finally, seeking the reason why symmetries get broken in the first place, Barrow and Silk explore topics ranging from the quest for the ultimate elementary particles to the formation of gauge and other "super theories." Publisher's Price: $17.95.

**4) QUARKS & LEPTONS** (An Introductory Course in Modern Particle Physics) by Francis Halzen and Alan D. Martin unlocks the secrets of the bizarre behavior of all subnuclear particles known to date. Coverage includes: Antiparticles • Electrodynamics of Spinless Particles • Quantum Chromodynamics • Weak Interactions and much more. Publisher's Price: $29.95.

### About the Club...

The Library of Science is the nation's oldest and most respected science book club. Dedicated to serving both professionals and serious avocationists, it surveys the entire field of published sources on scientific subjects to make the very finest works available to club members at substantial savings.

### Membership Benefits

In addition to getting the Physics Library for only $3.95 when you join, you keep saving substantially on the books you buy. • Also, you will immediately become eligible to participate in our Bonus Book Plan, with savings up to 70% off publishers' prices. • At 3–4 week intervals (16 times per year) you will receive the Book Club News, describing the coming Main Selection and Alternate Selections, together with a dated reply card. • If you want the Main Selection, do nothing and it will be sent to you automatically. • If you prefer another selection, or no book at all, simply indicate your choice on the card, and return it by the date specified. • You will have at least 10 days to decide. If, because of late mail delivery of the News, you should receive a book you do not want, we guarantee return postage.

2-BD3

**The Library of Science**
**Riverside, New Jersey 08075**

Please accept my application for trial membership and send me the Physics Library (00644), billing me only $3.95. I agree to purchase at least three additional Selections or Alternates over the next 12 months. Savings range up to 30% and occasionally even more. My membership is cancelable any time after I buy these three books. A shipping and handling charge is added to all shipments.

**No-Risk Guarantee:** If you are not satisfied—for any reason—you may return the Physics Library within 10 days and your membership will be canceled and you will owe nothing.

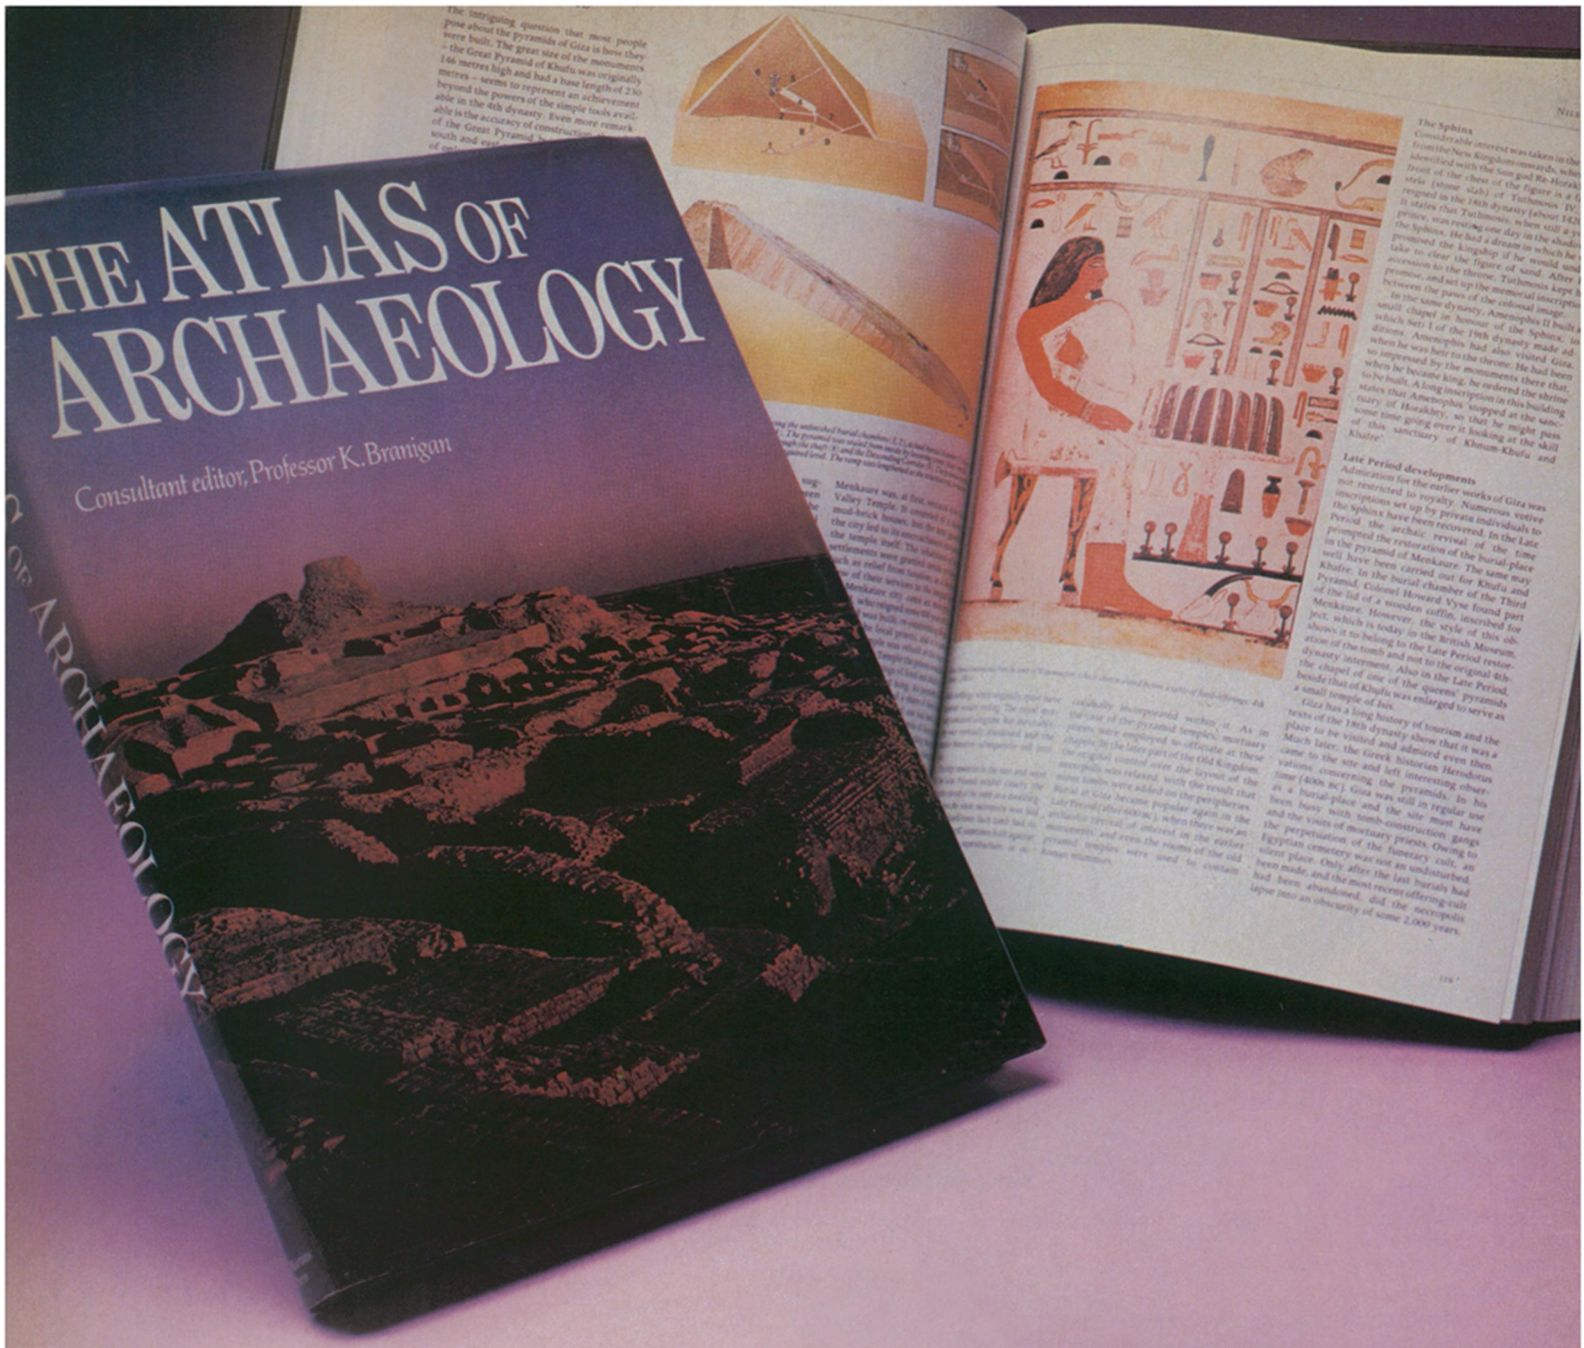
Science News 1/12/85



**The Atlas of Archaeology**
Edited by Keith Branigan

Describes fifty important sites throughout the world, providing a unique history of both the culture of past civilizations and the development of archaeology as a science.

Sites described include: Lascaux, the cave-painting site in France; Knossos in Crete; Pompeii in Italy; the Olduvai Gorge in Tanzania; the Valley of the Kings in Egypt; Catal Huyuk, the oldest known urban complex; the Ming Tombs in Peking; the rock-cut monastic complex in Ajanta, one of India's most famous artistic treasures; Anuradhapura, the ancient capital of Ceylon (Sri Lanka); Chichen Itza in Mexico; Machu Picchu, the "Lost City of the Incas" in Peru; and the cliff dwellings of the Mesa Verde in the United States.

Each site is examined from two viewpoints: first, through its excavation, illustrating techniques employed and finds discovered, and then by reconstructing the way of life of its people.

Clearly drawn regional and site maps accompany the text, as do illustrations of major artifacts and artwork reconstructions of the site's original appearance or its people's way of life. In addition, a gazetteer is linked to the regional maps, pinpointing the world's most important archaeological sites.

Over 300 photographs, many in color, with drawings, diagrams and maps. St. Martin's Press, 1982, 240 pages, 9¼ x 11¾, hardcover, $25.00.

**Science News Book Order Service** 1719 N Street N.W. Washington, D.C. 20036

Please send _____ copy(s) of **The Atlas of Archaeology.** I include a check, payable to Science News Book Order Service, for $25.00 plus $1.00 handling (total $26.00) for each copy.
