

THE ENCYCLOPEDIA OF

BIRDS

Edited by Christopher Perrins
and Dr. Alex L. A. Middleton

From the flightless emu to the wandering albatross, from the diminutive hummingbird to the enormous ostrich, THE ENCYCLOPEDIA OF BIRDS is a thorough, up-to-date, authoritative volume written and compiled by experts and provides the best and most incisive research on all species of living birds.

Combining readable articles and ready-reference information with the finest available wildlife photography and artwork, THE ENCYCLOPEDIA OF BIRDS *describes all 180 families of living birds*, is compiled from the work of a select group of active ornithologists and includes the most up-to-date front line research on the subject. The articles on each family include the details of distribution and ecology, physical features, evolutionary history and classification, diet and feeding habits, life cycles and reproductive behavior, social organization and survival status. THE ENCYCLOPEDIA OF BIRDS contains over 400 photographs and illustrations, 335 in *full-color*.
