*Revolution in Science*  
*I. Bernard Cohen*

Harvard University Press, 1985, 711 pages,  
9 1/2" x 6 1/2", hardcover, \$25.00

*Spanning five centuries and virtually all of scientific endeavor, Revolution in Science traces the nuances that differentiate both scientific revolutions and human perceptions of them, weaving threads of detail from physics, mathematics, behaviorism and more, into the larger fabric of intellectual history. Cohen discusses each transformation in each historical period and tells about the deep conceptual changes in our image of the scientist and scientific activity.*

# PERFECT SYMMETRY

THE SEARCH FOR THE BEGINNING OF TIME

Heinz R. Pagels

*Perfect Symmetry* takes us to the frontier of scientific thinking, to the state of the universe before the big bang (a time before the first one-billionth of a second) and before that to the creation of the universe out of absolutely nothing. Pagels details the latest astronomical discoveries, and, without using mathematical language, illumines the most revolutionary ideas in modern physics. He holds the view that someday soon physicists will understand the origin of our universe and its subsequent evolution as well as we understand stars today.

"Eloquent ... Pagels has shown a flair for graceful exposition ... He is also a wry philosopher."
