THE BOOMERANG BOOK

By John Cassidy

Being an introduction to the art of throwing, the science of understanding and the need for avoiding the Australian boomerang, an object which flies in accordance with advanced principles of aerodynamics, but in defiance of every shred of common sense.

- And, of course, the tool of the trade, the *Sky Turn*, a Finnish birch boomerang, designed and machined to be the finest returning sport boomerang in production anywhere.

- Step-by-step instruction in the tricks and techniques behind successful, round-trip boomeranging—for the complete klutz.

*Klutz Press, 1985,
58 pages, 10" x 15",
paperback, \$12.95*

"I suspect that this book will be the *Silent Spring* of the counter-revolution. It is a book that cancer researchers, toxicologists, government regulators, environmentalists and concerned laymen will discuss and argue about for years." — *Dr. Bruce N. Ames, Professor and Chairman, Department of Biochemistry, University of California, Berkeley, in Science '84.*

"Ms. Efron's documentation is sound and irrefutable... [and] also includes what is probably the most complete listing of known human carcinogenic agents ever assembled. Only with this knowledge can we understand the problems facing regulators: how the information can be interpreted in different ways and how it can be misused as well as politicized." — *Dr. Stephen S. Sternberg of Memorial Sloan-Kettering Cancer Center, in the Wall Street Journal.*

"Efron's book is readable and credible and expresses valid concerns. It should be read by everyone." — *Dr. Tom S. Miya, Dean of the School of Pharmacy, University of North Carolina, in The American Industrial Health Council Letter.*

*Simon and Schuster, 1984,
590 pages, 9½" x 6½",
paperback, \$10.95*
