Perfect for books, display or storage

This quality shelving system is made of natural European beechwood. A hard wood tough enough to be used for flooring and beautiful enough to be used for fine furniture. Do not confuse this item with "wood tone" or plastic imitations. Our low price is made possible by volume purchases, not by inferior material.

Sets up in seconds... without tools!

No tools, screws or glue required. Just take it out of its flat carton, fold the sides out, and the shelves practically fall into place. And natural beechwood is attractive... even unfinished. So the unit can be used immediately. Of course, you can also stain, varnish, or paint them if you prefer.

Stack them... they're interlocking

Each free-standing unit is 27 3/4" w x 11 1/2" d x 37" h and is designed to interlock and stack. This means you can actually create your own wall unit. And if you move, just fold them down and take them with you.

30 Day Money-Back Guarantee

Our low price for this European import is only \$39.95 per unit (plus \$6.95 shipping and insurance per unit)... probably less than you would have to pay for a comparable unit in plastic. And as with all items you purchase by mail from Barnes & Noble, you may return it within 30 days for a full refund or credit to your charge card.

"One of the things that makes *Gender Justice* unique as well as persuasive is the distinctive stance developed and carried through in the book. The authors take the position that 'equality' as such — men and women indistinguishable — is the wrong paradigm, for law and for policy. The right paradigm is 'liberty' and the authors demonstrate that even the 'equal protection of the laws' clause does not aim at 'equality' as a desired outcome but at the 'liberty' of each person to be what he or she can

be . . . (this) gives their book a kind of muscular vigor." — *Nathan Glazer, Harvard University*

Gender Justice, Kirp, Yudof, Franks. Univ. of Chicago Press, 1986, 9¼" x 6¼", 246 pages, hardcover, \$19.95

Myths of Gender is a long-overdue reassessment of scientific research and theories about sex differences. It is also a challenge to the authority of biologists and other scientists whose biases are often concealed behind a mask of "objectivity." Dr. Fausto-Sterling shows how the construction of genetic and sociobiological theories is in fact a social and political process that is deeply colored by social beliefs and values. At the core of the book is this critical question: Do women and men

think, feel and behave differently due to something innate in their biology? Many scientists have suggested that biology does limit and define our abilities, and have supported various prevalent stereotypes about women and men. After an exhaustive analysis of the biological, genetic, evolutionary and psychological evidence, Dr. Fausto-Sterling concludes that there is little support for these claims.

Myths of Gender, Fausto-Sterling. Basic Books, 1985, 9½" x 6¼", 258 pages, hardcover, \$18.95
