

THE RIDDLE OF THE DINOSAUR

By John Noble Wilford

“Unlike many other dinosaur books, this is not a picture book (although it is illustrated) or a review of specific types of dinosaurs. Rather, it is a sophisticated overview of how dinosaurs have been discovered, studied and theorized about for the past two centuries. The text includes numerous [biographical] sketches of paleontologists, with attention given to their early interest in dinosaurs.”

— *Library Journal*

“Wilford’s account of conflicts over interpretation, of the building and testing of hypotheses, gives us a stunning portrait of science in ferment. The ‘new’ dinosaurs are just as intriguing as the old ones.”

— *Publishers Weekly*

“*New York Times* reporter Wilford, so often writing about contemporary science and space, here reveals his true colors: he’s a dinosauraphiliac, a fan who has never outgrown the love or lore of the big beasts of yore.”

— *Kirkus Reviews*

“... a lively introduction to many of the fascinating characters who have pursued and studied dinosaur bones, and a survey of two centuries of scientific thought on evolution. Almost incidentally, the book also imparts information about dinosaurs, but not in the tedious detail and arcane language that would only attract a 9-year-old.”

— *New York Times Book Review*

Drawings of dinosaurs shown here are not from the book.

SCIENCE NEWS BOOK ORDER SERVICE
1719 N St., NW, Washington, DC 20036

Please send _____ copy(ies) of *The Riddle of the Dinosaur*. I include a check payable to Science News Book Order Service for \$22.95 plus \$1.00 handling (total \$23.95) for each copy. Domestic orders only.

TAKE THE
CAMBRIDGE ATLAS
OF
ASTRONOMY
for only \$4.95

when you join the
Astronomy Book Club...

You simply agree to buy 3 more books
—at handsome discounts—within the
next 12 months.

- 432 pages
- 10½" x 14½"
- More than 1100 photographs and illustrations, 680 in color, including the latest images from space

roduction by Sir Bernard Lovell

A
\$75.00
value.

Now here to convey all the excitement—as well as to report on the latest findings and controversies—of twentieth-century astronomy is THE CAMBRIDGE ATLAS OF ASTRONOMY. THE ATLAS offers uniquely broad coverage: from the history of astronomy to cosmology and the extraterrestrial life debate; from the mechanics of the earth and other planets to the structure and processes of the most distant galaxies and quasars. And it's yours for only \$4.95.

In THE ATLAS, you'll learn how recent discoveries of the Infrared Astronomical Satellite (IRAS), the X-Ray Detecting Satellite (Exosat), the Solar Maximum Mission (SMM) and various ground-based telescopes are al-

tering our perception of phenomena in our solar system and galaxy and beyond. Contents include: The Active Sun • The Formation of the Planets • The Galilean Satellites • The Voyager Missions • The Evolution of Stars • Supernovae • Stellar Nucleosynthesis • The Center of Our Galaxy • The Nearby Galaxies • Compact Radio Sources • The Origin of the Energy in Galactic Nuclei • Clusters of Galaxies • Cosmology • The History of Astronomy.

This remarkable 432-page volume features over 1100 photographs and illustrations handsomely displayed in a large-format edition. An international team of 44 astronomers contributed the authoritative entries.

Astronomy Book Club is operated exclusively for astronomy enthusiasts. The club is devoted to making the finest astronomy books available conveniently and inexpensively. Recent offerings have included titles by such eminent authorities as Patrick Moore, Robert Jastrow, John Gribbin and George Abell.

4 Good Reasons to Join

1. **The Finest Books.** Of the hundreds of books submitted to us each year, only the very finest are selected and offered. Moreover, our books are always of equal quality to publishers' editions, never economy editions.
2. **Big Savings.** In addition to getting The Cambridge Atlas of Astronomy for only \$4.95 when you join, you keep saving substantially, up to 30% and occasionally even more. (For example, your total savings as a trial member—including this introductory offer—can easily be over 50%. That's like getting every other book free!)
3. **Bonus Books.** Also, you will immediately become eligible to participate in our Bonus Book Plan, with savings of up to 70% off the publishers' prices.
4. **Convenient Service.** At 3–4 week intervals (6 times per year), you will receive the Astronomy Book Club News, describing the Main Selection and Alternate Selections, together with a dated reply card. If you want the Main Selection, do nothing, and it will be sent to you automatically. If you prefer another selection, or no book at all, simply indicate your choice on the card and return it by the date specified. You will have at least 10 days to decide. If, because of late mail delivery of the News, you should receive a book you do not want, we guarantee return postage.

The Astronomy Book Club

Riverside, New Jersey 08075

Please accept my application for trial membership and send me The Cambridge Atlas of Astronomy (37201) billing me only \$4.95, plus shipping and handling. I agree to purchase at least three additional Selections or Alternates over the next 12 months. Savings range up to 30% and occasionally even more. My membership is cancelable any time after I buy these three additional books. A shipping and handling charge is added to all shipments.

No-Risk Guarantee: If I am not satisfied—for any reason—I may return the Atlas within 10 days. My membership will be canceled, and I will owe nothing.
