

# M.C. Escher: Art and Science

Edited by H.S.M. Coxeter, M. Emmer, R. Penrose and M.L. Teuber

North-Holland

In March of 1985, an interdisciplinary congress was held at the Aula Magna of the University of Rome "La Sapienza," devoted to the Dutch artist Maurits Cornelis Escher. The congress was divided into sections, and this volume of the proceedings, *M. C. Escher: Art and Science*, follows the same pattern. In each section, papers from invited speakers and short communications are presented. More than 300 people from many countries took part in the congress, confirming that Escher's works still create a wide interest. The participants included mathematicians, physicists, crystallographers, chemists, biologists, psychologists, psychiatrists, art historians and experts in computer graphics and visual communications. The lively discussions that followed the presentation of each paper confirm that Escher's works are not only good examples of the visualization of scientific problems but also stimulate real scientific research. The volume is profusely illustrated in black and white and color.

# The quick and easy way to learn a foreign language!

Based on the U.S. Military "Speed-up" Method of Language Learning.

## Programmed for Rapid Learning!

It's been scientifically proven that we remember words we hear better than words we see. That's why you'll find the two audiocassettes in each Language/30 package more useful than all the language books money can buy. Just start listening to the tapes, repeat the foreign phrases a few times and, believe it or not, you'll begin speaking like a native. It's that simple!

Remember, Language/30 is a learning tool that works. It incorporates the "speed-up" method of language learning—the same method used to train U.S. government personnel who work overseas.

With Language/30, you can practice your target language anytime, anywhere. You won't have to set aside hours just for language study. You can listen to Language/30 while you're getting dressed, eating, driving to work, or even jogging. Whether you're studying French, Russian, Swahili, or any of the other 27 languages listed below, you'll improve your speaking fluency and listening comprehension each time you play the Language/30 tapes.

## Introduced by Language Expert Charles Berlitz.

Each Language/30 program features native voices speaking the most important and commonly used conversational phrases. You'll learn all the words you need to know for greetings, introductions, requests, and general conversations in hotels, restaurants, stores, theaters, and other places. And each cassette is introduced by world-renowned linguist Charles Berlitz, who explains the social customs and etiquette of the country.

So, whether you're going abroad for a short trip or an extended stay, you'll find that the fluency you've gained from Language/30 will make your visit easier, more pleasant, and more enriching. Instead of being a "stranger in a strange land," you'll be able to converse freely with the natives in their own language.

Each program comes with two 45-minute cassettes, convenient phrase dictionary, in a compact, 6" x 7" waterproof vinyl case.

## Which of these 30 languages would you like to speak?

1232628. Arabic	1232719. Indonesian	1232792. Serbo-Croatian
1232636. Chinese	1429232. Irish	1232800. Spanish

# Cultural Literacy

## What Every American Needs to Know

E.D. Hirsch Jr.

Hirsch shows that cultural literacy — the grasp of background information that writers and speakers assume their readers and listeners already have — is the hidden key to effective education in America. The high school student who thinks that Leningrad is a city in Jamaica or that the Alamo is an epic poem attributed to Homer cannot really

read. Nor can the college student who, on a general knowledge test, identifies Socrates as a Native American chief or the Great Gatsby as a magician. Hirsch outlines a straightforward plan for making cultural literacy our educational priority: Define core knowledge, put more of that information into school textbooks, and develop tests of core learning that can help students measure their progress.
