# THE WORLD OF THE PHARAOHS

CHRISTINE HOBSON

Here is an essential book for anyone intrigued by the ancient land of the pyramids. It offers not only a comprehensive record of civilization along the Nile, but also an in-depth account of the growth of Egyptian archaeology from its beginnings. Specially designed features give at-a-glance information on every aspect of the Egyptian achievement, whether temples, tombs and pyramids, mummies or hieroglyphs. In addition the author examines the mysteries of Egyptian religion, explains clearly and entertainingly the complexities of Egyptian kingship, and brings to life the daily routine of the common worker.

*The World of the Pharaohs* is a complete guide to ancient Egypt. Fully illustrated with stunning photographs, maps and diagrams, it provides the modern traveler, student or enthusiast with all the information necessary to appreciate this giant among early civilizations.

*How the Mind and Brain Interact to Create our Conscious Lives*

Michael S. Gazzaniga

*Mind Matters* describes how the mind and the brain are bound together—how activities on one level affect activities on the other. Dealing with subjects that range from pain to passion, from depression to delirium, from anxiety to addiction, the author takes the reader on a breathtaking tour of the latest research showing the myriad ways the mind interprets the chemical changes in the brain and thereby provides the substance of human consciousness.

*"There is a vast need to integrate our understanding of mental states with modern views of the normal function of the mind (cognitive science) and of the brain (neuroscience). This book is a fascinating and creative step toward that integration."*

— Professor Michael I. Posner,  
University of Oregon
