

Imagine a world of chaos and order, of cryptography and code breaking. A world of labyrinths, higher dimensions, and soaring fractal towers. This is Mathland, where the only thing to be expected is the unexpected. In *The Mathematical Tourist*, SCIENCE NEWS mathematics/technology editor Ivars Peterson takes readers on an unforgettable guided tour through this fascinating terrain, providing a true insider's understanding of the exciting and important discoveries being made at every turn. Rich with vivid images and provocative ideas, *The Mathematical Tourist* guides readers to a better appreciation for the dynamic and useful world of modern mathematics.

“A masterpiece of popular exposition....”
— Martin Gardner

- Compumania**, where the search for the highest prime number yields important clues for the creation of impenetrable computer security systems.
- Analytica**, where a seemingly simple problem that has baffled mapmakers for more than a century has recently been solved.
- Topology**, where the minimal surfaces of soap bubbles and soap films are being replicated in the construction of large, tent-like domes.
- The Fractal Mountains**, where new ways are being found to describe natural phenomena that could not be described before.
- Statland**, where you can toss a coin by phone, fully confident that the other party isn't cheating.
