

Your Hyperactive Child

By Barbara Ingersoll

A Parent's Guide to Coping with Attention Deficit Disorder

Doubleday, 1988, 219 pages, 8 1/4" x 5 1/2", paperback, \$7.95 ISBN 0-385-24070-8

This authoritative and up-to-date handbook provides a wealth of needed information that will help you understand and cope with your child's baffling disorder. Ingersoll, an experienced clinical psychologist, outlines the many practical steps you and your child's teacher can take to help your child. She describes in detail the symptoms and causes of hyperactivity, explains how it is likely to affect your child as he or she reaches adolescence and adulthood, and takes a close look at the full range of medical and psychological treatments currently available. Most important, she debunks popular nutritional remedies and describes a regimen of stimulant medication and behavior management that has been scientifically proven effective for most hyperactive children.

SERENGETI

NATURAL ORDER ON THE AFRICAN PLAIN

BY MITSUAKI IWAGO

"Never have I seen so many stunning photographs of African animals and landscapes in one volume."

— Richard Estes in *NATURAL HISTORY*

In 300 full-color photographs Iwago records the struggle of survival in a harsh and brutal landscape. A kaleidoscope of color and action, *Serengeti* overflows with riveting images: Iwago gives us the sublime magic of a wildebeest's birth, the helpless agony of a rhino mother unable to protect her calf from wild dogs, the playfulness of lion cubs swatting their mother's tail, the sweep of African sky and the elusive but omnipresent nourishing abundance of the land.
